2022 - ESG IS PERSONAL

Study of ESG Preferences and Advisory Practices in Hong Kong

Hong Kong investors are increasingly attuned to sustainable investing concerns.

Wealth managers that deliver a high-calibre ESG experience stand to see significant gains in loyalty, advocacy and assets under management.

A majority of Hong Kong investors say ESG is important in their investing.

63%

Over 6 in 10 place high importance on ESG factors in their investing.

ESG factors are important to a majority of investors across investable asset levels and ages.

Investable assets:

HK$400K - HK$775k	52%
HK$775k - HK$2M	67%
HK$2M - HK$5M	66%
HK$5M - HK$40M	59%

Age:

21 - 30	61%
31 - 50	63%
> 50	67%

The financial services sector has an opportunity to step up.

Only 1 in 14 Hong Kong investors are receiving a high-calibre ESG investing experience.

Those who do, reward their advisers with much higher advocacy, loyalty and walletshare growth.

High calibre ESG experience		Not a high calibre ESG experience
76%	Net Promoter Score	**-37%**
99%	Intent to add AUM in next 12 months	**76%**
5.2	Average referrals in prior 12 months	**2.8**

Advisors who can **harness client-centric tools, preference data & insights** throughout the client journey to provide a **more personalized sustainable investing experience** stand to capture the growing opportunities in this area.

3 components of a high-calibre ESG experience

Clear & committed adviser
Adviser clearly explains ESG concepts and is committed to helping investor invest sustainably

High preference-to-portfolio confidence
Investor has high confidence their current portfolio fully reflects their values

Closed-loop reporting
Investor receives regular updates that give a clear understanding about the sustainability performance of their investments on the ESG themes they care about most

Imperative: Close the ESG preference-to-portfolio gap.

Tight alignment between an investor's ESG preferences and portfolio is central to a high-calibre experience.

Only 11% of Hong Kong investors who are interested in ESG are confident their current portfolio is fully aligned to their values. Why?

Investors need ESG education...

Nearly half of investors are not knowledgeable on ESG concepts like *negative screening or impact investing*

40-50%

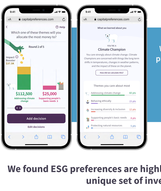
...and, they need help discovering their own ESG preferences.

Among investors who say ESG is somewhat important, important or very important...

37% can identify how much of their portfolio they want invested in ESG

30% Know how they want individual Environmental, Social, and Governance pillars represented in their portfolio

It underscores the need for wealth managers to educate and help investors discover their own ESG preferences.



We used a decision science-based "revealed preferences" method to profile investors' true ESG preferences.

See the revealed preferences method in action.

We found ESG preferences are highly individualised. Each investor has a unique set of investing preferences.

Female, 49 years
Location: **Hong Kong Island**
Altruism: **79**
Investing style: **Thematic**

Male, 37 years
Location: **Kowloon**
Altruism: **29**
Investing style: **Integrated**

Female, 52 years
Location: **Lantau Island**
Altruism: **52**
Investing style: **Balance of thematic & integrated**

We measured each investor's altruism, as well as their preferences for five sustainability themes, which were distilled down from the 17 United Nations Sustainable Development Goals.

Ethical behaviour · Natural capital · Empowerment · Basic needs · Climate change

The "So what?" for wealth management firms:

DO Measure investor preferences consistently with tools that quantify individual variation

DO Provide a range of ESG investing options that can satisfy the breadth of investor preferences

DO "Show the work"— demonstrate to investors how their preferences translate into a best fit portfolio

Adviser clarity and commitment is another key element of a high-calibre ESG experience.

Of investors with at least some interest in ESG...

Only 38% feel their adviser is committed to helping them invest sustainably

Only 14% report their advisers clearly explain ESG concepts and terms

The "So what?" for wealth management firms:

DON'T Expect advisers to become ESG experts overnight

DO Equip advisers with client discovery and education tools that instill confidence and provide "handholds" for meaningful ESG conversations

"Closing the loop" with investors on the sustainability performance of their investments is the final element of a high-calibre ESG experience.

Of investors who view ESG as important...

42%

Regularly receive reports that show the sustainability peformance of their investments

38%

Receive reports that *clearly show the magnitude* of sustainability performance for their ESG investments

The "So what?" for wealth management firms:

DON'T Overwhelm investors with ESG ratings and reports

DO Provide simple, meaningful sustainability metrics aligned to each investor's unique preferences

Implied Temperature Impact

1.5°C
