Stop feed outages before they happen with

Discover How

Preventing **Feed Outages** Starts with Real-Time Feed Inventory

Reliable Readings

BinTalk delivers dependable, real-time readings that provides 24/7 visibility into your feed bin levels.

Accurate Measurements

With >96% accuracy compared to bin scales, BinTalk provides accurate monitoring that's more affordable and easier to install.

Optimize Feed Management

Save time, reduce feed reclamation costs, and schedule feed deliveries more efficiently.

How **BINTALK™** Stacks Up:

Compared to other feed monitoring alternatives, BinTalk delivers accurate and reliable readings through hardware that's easy to install, delivering integrators with a scalable and more affordable feed management solution.

	BinTalk	Leading Competitor
No Contract Required	✓	✗
Frequently Self-Tests	✓ Every 2 Mins	✗ Every 4 Hours

Solar Powered Sensor	✓	✓
High-Quality Camera	✓ 35,000 Pixels	✗ 9,000 Pixels
Relocate Sensors for Free	✓	✗ Must Pay Fee

Clip. Connect. Monitor.

BINTALK'S SIMPLE SETUP. DIY IN 10 MINUTES!

Clips to the top of the bin.

BinTalk's patented clip-on mounting makes installation easy. Use the two self-tapping screws to secure it to the bin tightly and protect it from the feed truck auger.

Connect up to 8 BinTalk sensors per Gateway.

With over 96% accuracy compared to bin scales, BinTalk calculates feed levels using HD camera technology.

View feed levels in real-time at your fingertips.

View your feed bin levels in real-time with the BarnTalk app and web portal. Stop climbing bins and prevent feed outages before they happen.

Your Gateway to Precision Feed Management

By coupling real-time feed data from BinTalk with software solutions from MTech, you can streamline feed inventory management to optimize growth and maximize performance.

Prevent **out-of-feed** events

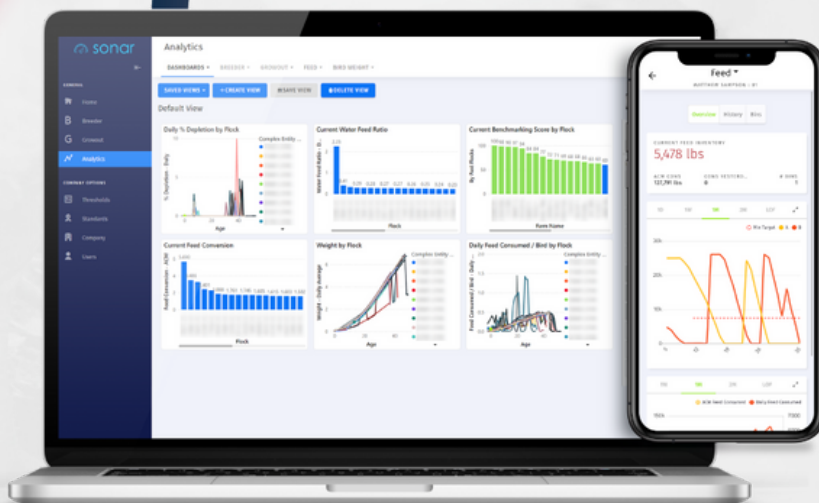

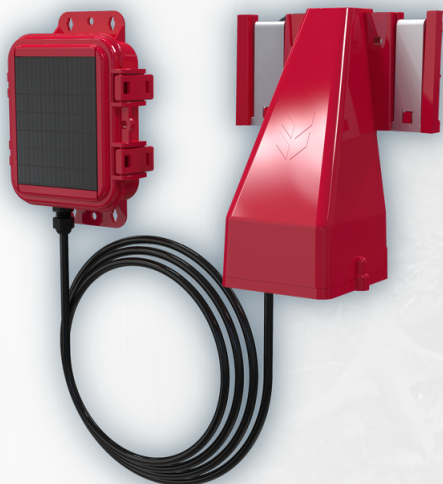

Schedule **feed deliveries** more efficiently

Monitor **feed consumption** in real-time

View **daily feed conversion** and **project growth**

“BinTalk helps the integrator order feed in a timely manner. Imagine when growers are choring barns in the evening choring barns in the evening **to find out the bin is empty** and expecting the mill to deliver that night.”

Spencer Wieser

“Finally have my BinTalk feed monitoring system. They work great!”

Brian Rosburg

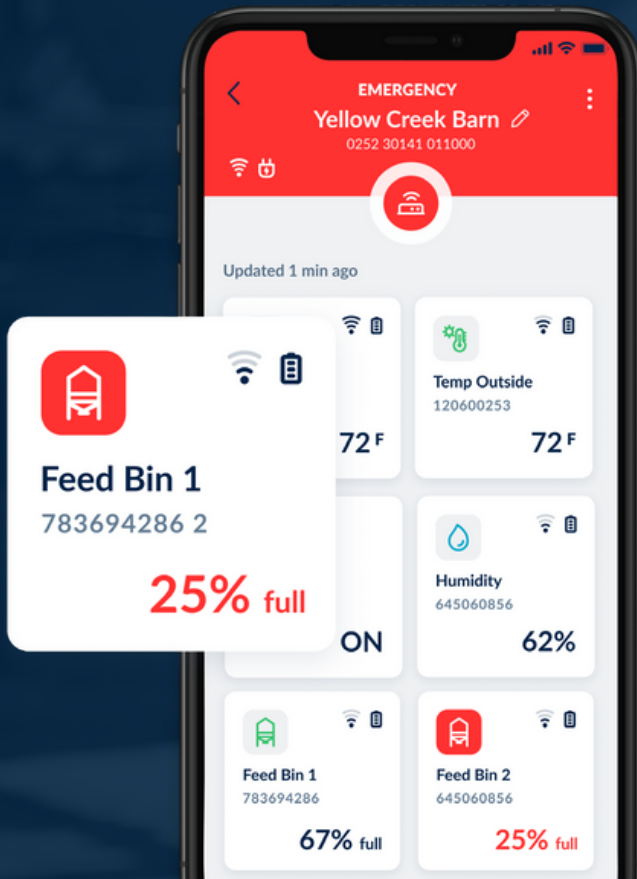

“Love not having to climb the feed bin for an inventory!”

Jay Mendenhall

Precision Feed.
