

WELCOME

Dear industry contact, we are trying to collect some information about the current status of communication between paediatric clinical trial networks and industry and also to find some examples of best practice when networks and industry have worked together on paediatric clinical trials. We intend to share examples of best practice and identify how and where communication between industry and networks can be improved. We would be grateful if you could spend a few minutes completing the survey.

*** 1. Name of the company**

*** 2. Head Office of the Company**

*** 3. What is your role in this company?**

*** 4. Does your company have a paediatric council/committee?**

Yes

No

*** 5. If no, who is the most appropriate contact or group to contact regarding paediatric studies?**

*** 6. Does your company have experience of trials in children?**

Clinical trials (Phase I-IV)

Epidemiological trials

Registry based studies

Other (please specify)

*** 7. Are you aware of the European Network of Paediatric Research Networks within the EMA (Enpr-EMA)?**

Yes

No

EnprEMA (Industry Survey) - Sharing Good Practice within EnprEMA and

***8. Have you, or your company worked with a research network (Enpr-EMA) or other network in the development and/or implementation of clinical trials with children?**

Yes

No

***9. If yes (Q8), what have been the benefits of working with a network? Can you provide specific examples?**

***10. If you have worked with a network have there been any challenges?**

***11. If no (Q8), what would be the best way to find out about the networks and identify an appropriate network or person to communicate with?**

***12. Can you suggest ways that would improve how you can contact the most relevant networks?**

***13. How would you benefit from better communication between industry and networks?**

Protocol development

PIP development

Feasibility of protocol design

Estimation of eligible subject numbers

Estimation of interested investigators and trial sites

Protocol consistency with current medical practice

Comparator use in current medical practice

Other (please specify)
