Booth 715

## BioResearch Monitors Inc.

### Corporate description

BioResearch Monitors, Inc., provides Quality Assurance Audits for Good Clinical Practice and Regulatory Compliance Services for Pharmaceutical Research & Development (GCP, GMP, GLP).

### Markets served

Good Clinical Practice Quality Assurance Audits and associated regulatory compliance consulting are the core services offered by BioResearch Monitors, Inc. We have been providing worldwide Quality Assurance services since 1992. Our clients include major and emerging pharmaceutical, biotechnology and other healthcare organizations sponsor-

ing and/or conducting research within the purview of FDA's Bioresearch Monitoring Program, ICH Good Practice Guidelines, and related multinational quality standards.

### Major services

BioResearch Monitors, Inc., provides Good Clinical Practice (GCP) Quality Assurance audits into all aspects of domestic and multinational clinical trials, including qualification and performance evaluations of Investigator sites, CROs, clinical and biopharmaceutical laboratories, and central pharmacies. We also audit data management operations and perform data verification, database validation and clinical final report reviews. Quality and compliance assessments provided in related areas of R&D include cGMPs for clinical trial materials, GLPs for Nonclinical Laboratory Studies, and requirements for electronic data systems used in support of regulated research.

### DIA information

Come to booth 715 and talk to us about your organization's needs for clinical quality assurance services.
