

WELCOME

Dear network, we are trying to collect some information about the current status of communication between paediatric clinical trial networks and industry and also to find some examples of best practice when networks and industry have worked well together on paediatric clinical trials. We intend to share examples of best practice and identify how and where communication between industry and networks can be improved. We would be grateful if you could spend a few minutes completing the survey.

*1. Nature of the Network

- Age specific
- Disease specific
- National
- Multi-specialty

Other (please specify)

*2. Proportion (in FTE) of employees in your Network with an industry liaison role/responsibility?

- <0.5
- >0.5-1.0
- >1.0

Other (please specify)

*3. What is your role within the Network?

*4. Is your Network:

- Able to collect national level data on real-time basis of clinical trials; started, postponed, cancelled, ended
- Able to follow national level data on real-time basis of clinical trials
- Unable to collect or follow the data of clinical trials on real-time basis (i.e. is dependent only on national medicines agency data or Eudra-CT data available)

Other (please specify)

*5. How is your network financed?

- National/Government/Ministry
- By a National central science administration agency
- Charity
- Hospitals
- Industry
- Grants/scholarships
- Other Private Sector
- Several funding parties

Other (please specify)

*6. Within your Network in 2012-2013 what percentage and total number of study Expressions of Interest were from industry (%)?

*7. Within your Network in 2012-2013 what percentage and total number of study feasibilities were from industry (%)?

*8. Within your Network in 2012-2013 what percentage and total number of studies conducted were from industry (%)?

9. What services do your network provide to industry?

- Protocol development
- Patient information sheet - design and content
- Site identification
- Feasibility
- Set up
- Research Governance
- Nursing support
- Pharmacy support
- Other (please specify)

***10. What benefits have you seen working with industry in the development and implementation of clinical trials in children? (have you a specific example or examples of good practice? (i.e. industry taking notes of expert or patient/family feedback during development; industry using new sites recommended by the network)**

***11. What challenges have you faced working with industry?**
