

The Appropriate Use of Antibiotic Therapy

This Special Report supplement includes 4 articles on the use of antibiotic therapy. One article, "Drug Resistance and the Treatment of Upper Respiratory Infections," has been approved for continuing medical education credit by Johns Hopkins University School of Medicine.

Richard E. Chaisson, MD, Professor of Medicine, Epidemiology and International Health, Johns Hopkins University, has reviewed the following articles, "Intramuscular Antibiotics in the Treatment of Pediatric Upper Respiratory Tract Infections," "Assessing the Risk of Adverse Reactions to Intramuscular Benzathine Penicillin G," and "Drug Resistance and the Treatment of Upper Respiratory Infections."

The reprinted article by Bisno and associates was peer reviewed prior to its original publication.
