NSAIDs: Optimizing Pain Management Through Risk Reduction

This supplement to *The American Journal of Managed Care* provides a clinical overview of pain management and the value of treatment with nonsteroidal anti-inflammatory drugs (NSAIDs). The discussion includes evidence that helps quantify the clinical and economic impact of serious adverse events associated with NSAIDs. Also discussed is the role of dose reduction in mitigating these risks and the potential benefits associated with new lower-dose NSAID formulations.

■ Faculty

Michael Fine, MD

Medical Director
Health Net
Laguna Beach, California

Michele L. Matthews, PharmD, CPE, BCACP

Associate Professor
Department of Pharmacy Practice
School of Pharmacy, Boston
MCPHS University
Boston, Massachusetts

■ SUPPLEMENT POLICY STATEMENT ■

Standards for Supplements to *The American Journal of Managed Care*

All supplements to *The American Journal of Managed Care* are designed to facilitate and enhance ongoing medical education in various therapeutic disciplines. All *Journal* supplements adhere to standards of fairness and objectivity, as outlined below. Supplements to *The American Journal of Managed Care* will:

- I. Be reviewed by at least one independent expert from a recognized academic medical institution.
- II. Disclose the source of funding in at least one prominent place.
- III. Disclose any existence of financial interests of supplement contributors to the funding organization.
- IV. Use generic drug names only, except as needed to differentiate between therapies of similar class and indication.
- V. Be up-to-date, reflecting the current (as of date of publication) standard of care.
- VI. Be visually distinct from *The American Journal of Managed Care*.
- VII. Publish information that is substantially different in form and content from that of the accompanying edition of *The American Journal of Managed Care*.
- VIII. Prohibit excessive remuneration for contributors and reviewers.
- IX. Carry no advertising.

Publisher's Note: The opinions expressed in this supplement are those of the authors, presenters, and/or panelists and are not attributable to the sponsor or the publisher, editor, or editorial board of *The American Journal of Managed Care*. Clinical judgment must guide each professional in weighing the benefits of treatment against the risk of toxicity. Dosages, indications, and methods of use for products referred to in this supplement are not necessarily the same as indicated in the package insert for the product and may reflect the clinical experience of the authors, presenters, and/or panelists or may be derived from the professional literature or other clinical sources. Consult complete prescribing information before administering.
