

Biologics and Benefit Design

This supplement to *The American Journal of Managed Care* discusses recent research and proprietary analytic tools employers can use to design a benefit plan that is fiscally responsible, yet does not saddle their sickest employees with burdensome out-of-pocket expenses or restrict members' access to essential therapies, such as biotechnology-derived treatments. This supplement also includes commentary from several industry leaders regarding their time-tested approaches to developing effective benefit strategies.

■ Faculty

Robert D. Moroni (Moderator)

Consultant
Saline, Michigan

Barbara J. Hodge

President and CEO
Integrated Therapeutics Institute
Greenfield Center, New York

David Hom

Vice President, Human Resources
Strategic Initiatives
