

**FINALIST**  
*Philip Wyatt*

Dr. Philip J. Wyatt is the Chief Executive Officer of Wyatt Technology Corporation. He is a Fellow of the American Physical Society and the Optical Society of America. He has been working in the field of development of new instruments for the characterization of synthetic and natural polymers, proteins, and colloidal particles for his entire life. He is a founder of Wyatt Technology Corporation, currently the largest company specializing in the development and manufacturing of the light scattering and related instruments for polymer characterization. He has contributed considerably to the methodology of the characterization of synthetic and natural macromolecules, detailed description and knowledge of the polymer molecular structure and the properties-structure relations. Dr. Wyatt invented the first multi-angle laser light scattering instruments. He founded the first commercial instrument company to incorporate a laser and an on-board microprocessor. He has written more than 40 patents and over 70 publications.
