

Chromolith® 3mm
 the new dimension in monolithic HPLC columns

- Faster analysis at lower flow rate
- Longer column lifetime and major cost savings

The Cool Response to Volatile Situations PL-ELS 2100 Ice
 Sub-Ambient ELSD for Semi-Volatile HPLC Analyses

- Sub-ambient Operation, down to 10°C
- Maximum Sensitivity for Semi-Volatiles
- Active Heating/Cooling
- Universal Detection
- Complementary Detection for LC-MS
- Unrivalled Accuracy of Quantification
- Ideal for High Resolution HPLC
- User-friendly Software

 Columns with outstanding performance, stability and price

Columns for: Reversed phase HPLC
 -Normal phase HPLC
 -SEC + GPC
 -Chiral Separations
 (+ new: Cellulose coated Phases)
 -Ion exchange
 -Ultrafast HPLC with 1.8 µm part.

All in diameters from 50 µm upto 50 mm from nano upto preparative

Columns made in Germany Malsch

NEW! Analytical Sample Preparation Catalog
 ...products for high analyte recoveries and extract purity

APPLICATIONS

- Bioanalytical
- Clinical
- Environmental
- Forensic
- Food/Agrochemical

TECHNIQUES

- SPE
- Sample preparation
- Protein precipitation
- Supported liquid extraction

Also included: technical and optimization information.

ZEOCHEM®

Zeochem's Swiss precision and more than 30 years of experience have made us one of the world's leading manufacturers of chromatographic silica gels. That's reason enough for our customers to look out for the little® - such as with ZEOprep®, as shown here. ZEOprep® irregular chromatography gel has tight specifications and virtually rounded edges, providing better resolution and reproducible separations. More information on this and our many other silica gels can be found at www.zeochem.ch
