

OSO BioPharmaceuticals Manufacturing, LLC

Corporate Description

OsoBio is a contract manufacturing company with an emphasis on cGMP production of a range of unique product demands for sterile liquid, suspension and lyophilized formulations—including clinical to commercial batch sizes and complex potent compounds. For close to three decades, our professional staff and technologically advanced manufacturing facilities have handled almost every category of biological or pharmaceutical product from clinical to commercial scale.

OsoBio has an exemplary regulatory record that surpasses quality-assurance expectations within our industry. Our employees are industry veterans who provide innovative solutions to our clients' most difficult projects. Today, with a renewed commitment to customer service and a solid foundation for growth, OsoBio is poised to exceed your expectations on every level.
