## Smithers Pharma Services LLC

### Company Description

Smithers Pharma Services provides superior quality and value in contract research and regulated testing to its clients by rapidly delivering effective and robust testing services, accompanied by clear, concise, and timely communications, using an advanced quality management system. Smithers Pharma Services works with you to identify your specific needs. We have developed a team of experts capable of thinking

through the entire pharmaceutical process, from the discovery phase through commercial sales. With a strong emphasis on clear communication and greater attention to details, Smithers Pharma Services creates the right solutions for your business.

### Technical Services

- Discovery-level formulation screening via SPEED™
- Pre-formulation characterization
- Formulation development
- Pre-clinical and clinical bioanalytical testing services
- Customized research
- Analytical method development and validation
- Full cGMP analytical testing services
- Stability testing
- Project management

### Facilities

Smithers Pharma Services stays ahead of current technologies to bring you the most advanced solutions. Our scientists' vast experience and aptitude in utilizing high-tech laboratory equipment offer an advantage over other contract

laboratories. Our scientists have received the highest levels of training, and pass this knowledge on to our clients through careful guidance and collaboration. At Smithers Pharma Services, we work closely with clients to analyze the complete process and develop methods that will deliver accurate, reliable data. We invest in our infrastructure so that we may intelligently address our clients' ever-changing business issues.

### Major Products/Services

Smithers Pharma Services provides pre-formulation and formulation services, analytical chemistry, and pre-clinical and clinical bioanalytical testing, while offering further drug development support through in-house storage stability studies. Smithers Pharma led the Bioanalytical Quality Standards Initiative (BQSI), an industry working group established to develop documented quality management standards for bioanalysis in support of clinical trials.

### Markets Served

Smithers Pharma serves the pharmaceutical, biotechnology, and consumer healthcare industries, delivering a broad portfolio of services to help our clients move their drug products through the full drug development process, from pre-formulations to market registration.
