OUTSOURCING and Consulting Services

Avema Pharma Solutions

Corporate Description

Avema Pharma Solutions, a division of PL Developments, is a contract manufacturing organization committed to delivering superior products and services to the pharmaceutical market. As part of an organization with more than 20 years of experience helping global firms manage their entire supply chain, from product development, product manufacturing and packaging to retail distribution, Avema will continue to serve as a world-class partner with an unparalleled focus on customer service.

Major Products/Services

Avema Pharma Solution's state-of-the-art Miami facility construction was completed in early 2006 as a premier pharmaceutical manufacturing operation. The facility is FDA registered and cGMP compliant. It was designed and built by Integrated Project Services (IPS) and features segregated, positive pressure, and HEPA filtered manufacturing and packaging lines with a climate and humidity controlled warehouse.

The facility offers a diverse mix of manufacturing equipment which can produce the following types of prescription, over-the-counter pharmaceutical, and nutritional products:

- Tablets
- Caplets
- Two-piece Hard Shell Capsules
- Chewable Tablets
- Quick dissolve Tablets

We offer versatile capabilities in the area of solid oral dosage packaging. Utilizing our in-house capabilities and our partnership with our parent company, PL Developments, we have extensive and versatile capabilities including:

- High-speed bottle filling
- In-line label/insert/outsert application
- High-speed, in-line, glue or tuck cartooning
- Thermoformed and Cold-formed blisters
- Carded or Wallet blister packaging
- Child resistant and senior-friendly packages
- Segregated, positive pressure, HEPA filtered packaging suites

All of our services are supported by our Quality Assurance, Quality Control, and Regulatory staff. These individuals ensure cGMP compliance at every step of the manufacturing process. Services offered include:

- Raw Materials and Finished Goods testing on-site
- In-process testing
- Fully equipped analytical laboratory
