## **Description**

Pace Analytical Life Sciences provides CGMP- and GLP-compliant contract analytical laboratory services in microbiology and analytical chemistry for the pharmaceutical and medical-device industries. We follow compendia and proprietary methods and can custom develop methods specific to customer requirements. Our laboratories are located in Oakdale, Minnesota, and San German, Puerto Rico.

## **Products and services**

Pace Analytical Life Sciences provides contract analytical testing services that include methods development and validation, raw-material testing, stability testing and storage, product-release testing, chemical characterization, residual chemical analysis, sterility testing, microbial identification, and facility-validation support. Pace Analytical Life Sciences is FDA-registered, DEA-registered, and ISO-IEC 17025-accredited.
