INGREDIENTS and Materials

Eastman Gelatine

Corporate Description

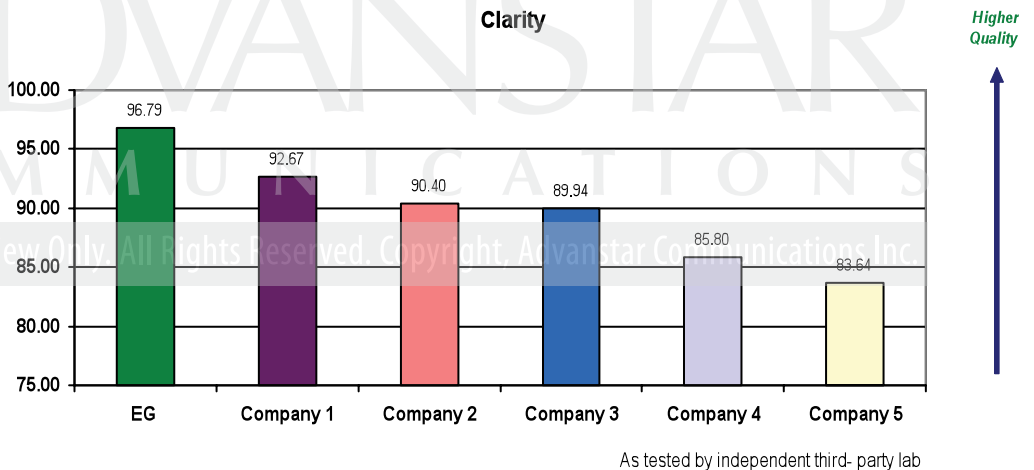

Eastman Gelatine, a subsidiary of Eastman Kodak Company, has been manufacturing high quality pure gelatin for numerous applications for more than 80 years. While its major market has historically been the photographic industry, the purity and clarity of its gelatin has created worldwide appeal from the pharmaceuticals, nutraceuticals and food markets.

Quality Driven Processes

Eastman Gelatine's acceptance and welcome from the pharmaceutical market stems from the value the pharmaceutical industry places on the quality, purity, consistency and traceability that Eastman Gelatine provides. This, together with

Gelatine has leveraged its photographic gelatin expertise, advanced processes, and experience to meet the demanding standards of the pharmaceutical industry.

Rigorous daily manufacturing processes and quality performance checks enable Eastman Gelatine to produce superior purity and quality gelatin. Part of this includes routinely comparing its gelatin to leading manufacturers in its quest to clearly substantiate its claim of world-class clarity and purity. Accordingly, Eastman Gelatine has full traceability of its core components as well as full control of its manufacturing process. No other supplier offers equivalent focus or comparable gelatins.

its ability to deliver batch-to-batch consistency, is fundamental to meeting and exceeding customer expectations.

Attention to changing customer needs, manufacturing diligence and dedicated, resourceful employees are a formula for manufacturing and servicing customers that spans more than eight decades. Since traditional silver halide chemistry demands the purest raw materials and the highest level of quality, Eastman

Products

Eastman Gelatine offers both Type A and Type B pharmaceutical grade bovine bone gelatin available in a wide range of Bloom strengths. Pharmaceutical products commonly using these gelatin types include capsules, tablets and vitamin coatings. Eastman Gelatine is the only USA owned gelatin manufacturer selling exclusively bone gelatin made only in the USA with raw materials exclusively sourced from the USA and Canada.
