

Velesco Pharmaceutical Services

Corporate Description

Velesco Pharmaceutical Services is a CMC contract research organization capitalizing on the research experience and expertise in early stage drug development gained from our team's tenure in the pharmaceutical industry.

Focus areas include 1) Formulation of novel delivery solutions for non-clinical and clinical formulations, 2) Analytical methods developed by a team with proven problem solving capabilities, and 3) Early phase cGMP Clinical Trial Materials with capabilities across non-sterile dosage forms. Velesco offers personalized project management and expert advice to ensure the best chance of success in clinical trials. We are quick to initiate projects, emphasize effective communication, and maintain the flexibility that our clients need.

cGMP Clinical Supplies

- Made-to-Order clinical supplies
- Quality system designed to enhance efficiency of early phase manufacture
