Description

Pfizer CentreSource is a separate division within Pfizer that offers worldwide expertise and capacity in fine chemicals and finished dosage form manufacturing. Our fully accredited worldwide manufacturing network is supported with dedicated project teams, an excellent record of regulatory compliance, and a history of innovation and long-term investment in facilities.

Products and services

The Fine Chemicals Business Unit is a recognized industry leader in steroid synthesis and production, and custom GMP fermentation. The Contract Manufacturing Business Unit offers state-of-the-art facilities that meet or exceed GMP standards for sterile dosage forms for even the most complex pharmaceutical and biopharmaceutical formulations.
