## MANUFACTURING Equipment and Supplies

# Natoli Engineering Company, Inc.

### Corporate Description

A global leader for 40+ years, Natoli Engineering Company, Inc. is the worldwide source for superior tableting equipment and support services. Founded on a philosophy of providing quality tablet compression tooling at a fair price with exceptional customer service, Natoli is committed to developing innovative solutions that exceed the highest industry standards and specifications.

### Facilities

Located in one of the Midwest's finest progressive industrial parks, the Missouri Research Park of St. Charles, Natoli's 120,000 square-foot campus includes administrative, manufacturing, refurbishing, training, laboratory, and scientific research facilities.

### Major Products/Services

**Tablet Compression Tooling**—Natoli manufactures top-quality tablet compression tooling in simple and complex designs, from more than 18 steel types and 10 specialty coatings.

**Tablet Presses**—A full range of cost-effective options, from heavy-duty rotary presses to single-station laboratory models that are ideal for research and development.

**Tablet Press Replacement Parts**—Natoli maintains an extensive inventory of tablet press replacement parts and turrets for virtually all press types that outlast, outperform, and are less costly than original equipment manufacturers' parts – with most available for same day shipping.

**Tablet Compression Accessories Catalog**—The most comprehensive industry catalog features hundreds of products to help you clean, lubricate, maintain, store, and analyze your equipment to prolong tool life, support your investment, and increase productivity.

### Laboratory Services—

Natoli Scientific: Uses research and testing to find proactive and customized solutions to address complex manufacturing issues such as wear, sticking, picking, and tablet press tool binding. Natoli recently opened the Natoli Institute for Industrial Pharmacy Research and Development to provide

additional laboratory and research opportunities to investigate tablet manufacturing issues.

**Natoli Metallurgy:** Dedicated to providing services that bring the highest return on tooling investments, including material selection, wear testing, and steel failure analysis.

**Technical Training**—Learn the latest tablet technologies and improve your processes through hands-on training and lectures from world-renowned academic and industry experts.

**Tablet and Tooling Design**—Natoli engineers provide expert tablet and tool design services to ensure tablet quality, maximize production, and enhance product lifecycle. Or quickly and easily design tablets in-house with Natoli's web-based design software, TabletCAD.

**Tablet Press Refurbishing and Repair**—Natoli's expert engineers customize each request and rebuild each press to exceed original quality, safety, and functionality.

### Markets Served

With distributors in 70+ countries, Natoli serves the pharmaceutical, nutritional, industrial, confectionery, veterinary, and chemical industries worldwide.
