

Corporation Scientifique Claisse Inc.

regular 220 volts, 20 amperes power outlet. Our borate fluxes consist of fused, spherical & vitreous particles. They are homogenous and do not contaminate your samples. Our platinum Labware are made of 95% platinum, alloyed with 5% gold, and are designed and manufactured as per our own quality requirements. Furthermore, all Claisse clients can profit from our outstanding consultation services, available on-site in their laboratories.

Facilities

Claisse is based in Quebec City, Canada. The location houses sales, service, design, manufacturing, and R&D activities. All sales and product support in the USA are handled through our US Division in Madison, WI. Outside of the USA, sales and support can be obtained from our well-trained worldwide representatives' network.

Company Description

Claisse is a Canadian company dedicated to sample preparation by fusion. It manufactures world-renown fusion instruments, fused borate fluxes and high quality platinum Labware. Our consultation service is outstanding and our specialists can go to your site to train your chemists and work with you on your samples. Our objectives are to supply XRF, AA, and ICP analysts with material, assistance and new techniques for their work with fusion. Claisse has a division in Madison, WI. John A. Anzelmo, manager of USA operations, brings 32 years of experience in the fields of XRF as applications scientist, laboratory manager, product manager and marketing manager for Thermo ARL and Bruker.

Chief Spectroscopic Techniques Supported

- X-ray fluorescence analysis (XRF)
- Atomic absorption analysis (AA)
- Inductively coupled plasma analysis (ICP)

Markets Served

Claisse distributes its products in more than 70 countries around the world. Our main industrial customers are cement plants, mining companies and ferroalloys, steel, aluminum, catalysts, polymers, ceramics, glass, petroleum and oil companies. We also serve universities and laboratories that are concerned with geology and mineral prospecting. Our commitment is to provide a 100% satisfaction level to our customers. Our friendly approach and our outstanding services are our distinctive identity.

Major Products/Services

Claisse manufactures automatic fusion instruments to make glass disks and/or solutions from inorganic samples. One model in particular "TheBee" is electric. It is a plug and play fluxer. You only need a
