Quality Manager at Allcyte GmbH

Application to be sent to: HR@allcyte.com comprising a CV and a cover letter under job code QM219.

www.allcyte.com

Allcyte is a pioneer in the field of functional precision oncology. We provide actionable data on the activity of drug candidates directly in live tissue samples of human cancer patients to support strategic R&D decision making in the pharmaceutical industry. Primary patient tissues are as close as one reasonably can get to an actual patient prior to running clinical trials. By using them as translational model systems, our goal is to generate preclinical data that is more relevant to the actual clinical situation than is possible with conventionally used cell line, organoid or animal models, and thus enable the planning of more targeted clinical trials with higher chances of success.

Leveraging our deep-learning powered Pharmacoscopy® high content imaging platform, we can do this with unprecedented single cell resolution and scale (Snijder, Vladimer et al., Lancet Hematol. 2017, Vladimer, Snijder et al., Nat. Chem. Biol. 2017, Schmidl, Vladimer et al., Nat. Chem. Biol. 2019). The potential of Pharmacoscopy® in personalized cancer medication has been validated in a prospective interventional clinical setting (Staber et al., ASH 2020). Building on this expertise, we are further in the process of certifying our Pharmacoscopy® platform for clinical research as well as routine patient care applications.

We are recruiting a highly motivated Quality Manager on a full-time basis to take responsibility within Allcyte’s Quality Management team, and maintain and contribute to the continuous expansion of our ISO 13485 based quality management system.

Your responsibilities will be:

- Maintenance of the standard operating procedure (SOP) system
- Compilation, review and release of SOPs
- Deviation and CAPA management
- Change management
- Coordination of staff training
- Participation in the preparation and conduct of internal and external audits
- QM support for clinical trial organization and documentation
- Support for laboratory safety management
- Support for all departments in quality related matters

Educational background, experience and technical skills we are looking for:

- Bachelor or Master degree in life sciences; or a technical education (HTL) or quality management education with at least 5 years experience in R&D or clinical studies
● Min. 2 years experience working in medical device or drug development, production, or clinical studies
● Previous exposure to the concepts of quality management or work in a quality controlled environment is essential
● Min. 2 years experience working in quality management is desirable
● At least basic knowledge of GCP, GMP and/or ISO guidelines
● ISO 13485, ISO 9001, GCP, and/or GMP qualification is a plus
● IT-affinity and experience working with online tools and databases
● Experience in working with cloud-based document or quality management systems is a bonus
● Excellent written and spoken English and German skills

Personal qualities we appreciate:

● Ability to work with high accuracy, reliability, and precision, even under time pressure
● Independent, resourceful, structured, and solution-oriented team-player
● High degree of pragmatism
● Excellent organizational skills and an analytical mindset
● Dynamic, highly motivated and fast learning
● Positive can-do attitude and the desire to make a difference

What we offer:

After your successful application, you will join our dynamic, international, interdisciplinary (and fun) team at Allcyte in Q2-Q3 2021. You will have the unique opportunity to grow with the company, while at the same time contributing to pioneer innovative therapeutic and diagnostic initiatives in oncology. In accordance with the Austrian collective bargaining agreement, we offer a minimum gross salary starting from € 36,530,- annually for this full time position. We are of course willing to negotiate overpayment based on your previous working experience and qualifications. Additionally, we offer flexible working times and the option to work from home.

Vienna is a budding biotechnology hub in the heart of Europe and was voted the city with the highest quality of life in the world by Mercer for eight consecutive years - confirming our own view that Vienna is indeed a great place to live and work.
