

Put the power of Gamification *in your hands*

It wasn't long after gamification was first introduced to the learning community that it became the hottest buzzword around. And with good reason. **Games have proven critical to the success of every learning initiative**, in both virtual and live training, for driving home key learning concepts.

Red Nucleus has always offered a variety of interactive games, each uniquely suited to address different training goals including **concept reinforcement, confidence assessment, and knowledge retention**. Now we have a solution that puts the power of gamification at your fingertips.

RCADE
GAME AUTHORIZING PLATFORM

...gives you the power to:

- Invest once but implement gamification across multiple divisions, brands, and initiatives
- Author, edit, and categorize game questions
- Publish any games with ease, as many times as you'd like
- Keep tabs on the progress of your players and teams via reporting and real-time scoreboards and leaderboards

Rcade is a game authoring platform designed to provide your training teams with a powerful and flexible learning reinforcement tool. Rcade offers a new **level of ownership for administrators** while enabling learners to access and **play games as individuals, compete against their peers, or compete as a team** in a live or virtual setting.
