

# SUSTAINABLE WEDDINGS AT FOTOGRAFISKA

*Creating memories for life*

Fotografiska, Stadsgårdshamnen 22, Stockholm

Fotografiska

There is no question that your wedding is meant to be one of the best days of your life. Together, we can also make it a sustainable day—in every sense of the word. Here are some tips to consider, and some things we can do to help you plan for a spectacular party.

## The venue

The venue really can affect how sustainable your big day is. At Fotografiska, we have a long history of arranging weddings and larger celebrations. It's important to us to track and minimize our carbon footprint, along with offering good conditions for our guests and partners, suppliers and coworkers. We are happy to assist you with guidance and recommendations concerning details that make a difference.

## Invitation

Have you considered to skip a traditional printed invitation? By sending digital invitations, you will save both money and a few trees. A digital invitation also gives you the possibility to add moving images, interactive solutions or music. One tip when writing the invitation is to be inclusive in your choice of dress code. You can also recommend your guests to rent or borrow their clothes. Or why not have a vintage-theme?

## Transportation

The guests' mode of travel, and distance, to and from the wedding, are parameters that can make a huge difference. Are they coming from far away? Is carpooling an option? A memorable and climate-smart solution could be to get to Fotografiska by boat. Through our partners, we can offer a beautiful boat ride, powered by 100% green electricity. We're also happy to recommend other great transportation-solutions, suited to your party.

## Accommodation

Do your guests need a place to stay the night? There are several nice options—both hotels and hostels—near Fotografiska, where you and your guests can stay with a good conscience. We are happy to suggest nearby accommodation with a genuine focus on sustainability.

## Accessibility & inclusion

We want everyone to feel welcome at Fotografiska. Our venues are equipped with modern technology and aids to make them as accessible as possible. Please don't hesitate to contact us and we will give you a tour. Together, we can create the best conditions for your big day and for your guests.

## The food

Sustainable wedding cake? Of course! When creating our menus, we make sure that the farmers and other producers have a genuine love for nature and for animals—key to tasty and sustainable produce. At Fotografiska, you always find plant-based delights, according to season. The flavors are sensational and leave you with a good aftertaste—not just for today, but also for a better future.

## Ethical conditions

It is essential to us that you feel secure when you choose to host your party at Fotografiska. We consciously invest in our employees' well-being, and personal development. Diversity, inclusivity, equality and sustainability are constantly ongoing processes here. That is our way of building a creative and enthusiastic workplace with good conditions.

## Think circular

At Fotografiska, we work actively with what we call “Beyond Waste” and “Upcycling”. Upcycling can be described as the ability to take something old, that has lost its original function, and giving it new life. There is an abundance of beautiful wedding clothes, just waiting to bring joy to a new owner—perhaps you will find your dream-clothes at a second hand-store, or by renting?

## Décor

Here, small details can make a huge difference. Is there anything you can borrow, or rent? Are single-use items necessary? Try choosing flowers that are in season, organically grown and Fairtrade. Simple décor is included in the venue, and we are happy to recommend florists that focus on sustainable offerings.

## Gifts

Do you want to avoid wedding gifts that affect Mother Earth? Tell your guests about gifts that would be appreciated and used, or recommend them to donate to charity. Perhaps you can encourage them to buy something second hand, or an experience that is kind to both wallet and our planet's resources? Our shop is also filled with Fairtrade, climate-smart, and sustainable products.

## The honeymoon

Perhaps it is time to leave flights behind? The possibility of going farther away by train is constantly improving, and trains transform the journey itself to part of the experience. There are also several possibilities to reduce your carbon footprint when travelling. And don't underestimate the magic of discovering and experiencing hidden gems closer to home.

## Together we can make a difference

At Fotografiska, we have a systematic perspective on sustainability, and strive to minimize our ecological footprint. When hosting a party or event at Fotografiska, you take part in our work by investing in carefully chosen sustainability projects. Welcome to Fotografiska!
