

RXT-W-B / Frosted Flush Lens

## Regolo IP65 Rated RXT-W-B

Wall  
BI-DIRECT  
Light Distribution

The RXT-W-B IP65 wet location rated linear lighting system brings the elegance of the Regolo product series into harsh outdoor environments where moisture, wind and dust can be an enemy to a light fixture.

- *Rugged three-sided .125" thick aluminum housing with affixed end caps.*
- *Housing standard finish is electrostatically applied textured white powder coat paint. Optional silver, black, or custom color paints finishes.*
- *IP65 rated exterior linear luminaire designed for demanding environments for protection against water, dust, oil, and bugs.*
- *Fully sealed gasketed lens and electrical fittings. Vandal resistant 1/4" thick lens has an 08 IK Rating with no exposed fasteners.*
- *Natorium finish standard.*

### Standard Individual Fixture Lengths

2' (609 mm)	
3' (914 mm)	
4' (1219 mm)	
5' (1524 mm)	
6' (1828 mm)	
7' (2133 mm)	
8' (2438 mm)	

### ORDERING INFORMATION / Example: RXT-W-B-FF-09-L35-UNV-D-11-WH-W-8

## FIXTURE FINISH

RXT is available in three standard powder coat painted finishes including White (**WH**), Black (**BK**), Silver (**SV**), and Custom Color (**CC**).

WH - White Finish

BK - Black Finish

SV - Silver Finish

CC - Custom Color

## MOUNTING OPTIONS

RXT-MR-B-FF

## SENSOR OPTIONS

## PRODUCT SPECIFICATIONS AND INFORMATION

### HOUSING CONSTRUCTION

The housing consists of rugged three-sided .125" thick aluminum housing with affixed end caps. Housing is IP65 rated exterior linear luminaire designed for demanding environments for protection against water, dust and oil. The fixture construction is natatorium appropriate standard.

### LEDS AND OPTICAL SYSTEM

Optical systems consist of a single row of mid power constant current LEDs mounted to a removable highly reflective powder coated metal reflector. Vandal resistant 1/4" thick lens has an IK rating of 08 with no exposed fasteners. Frosted lens diffuses LED light source while delivering high efficacy general illumination.

### STANDARD DIMMING LED DRIVERS

Standard constant current integral electronic 0-10v dimming input. Two standard driver options are available. Option **D** dims to 1% and option **DO** dims to 0% or OFF (the final 1 percent is a "step"). Both options are the same price and representative of the base fixture price. Options **D** and **DO** ship with 5 wires (Line Voltage- Black and White wires, Low Voltage- Purple and Pink wires, Ground- Green wire).

### DALI DRIVERS

Standard constant current DALI drivers available in either a dim to 1% (**ELE**) or dim to 0% (**ELS**). DALI fixtures ship with 5 wires (Line Voltage- Black and White wires, Low Voltage- Purple and Pink wires, Ground- Green wire).

### LIGHT OUTPUT

Standard factory set light outputs are programmed to within +/- 5% of the nominal light level at 3500K 80 CRI LEDs. Light output, wattage, and efficacy will vary across different CRI's CCT's. Refer to ies files on the website for actual detailed lighting performance data.

### CIRCUITING

Each luminaire may have up to 2 line voltage (Power) circuits and 2 low voltage (Control) circuits. Two power circuits are required for independent control of uplight and downlight in bi-direct luminaires, and low voltage control circuits are for independent dimming of each circuit.

#### Examples:

- **"1-1"**- 1 power circuit (Line Voltage) and 1 control circuit (Low Voltage) > 5 wires total (1 Black Wire "Hot", 1 White Wire "Neutral", 1 Green Wire "Ground", and 2 low voltage control wires, 1 Pink wire and 1 Purple wire)
- **"2-2"**- 2 power circuits (Line Voltage) and 1 control circuit (Low Voltage) > 9 wires total (2 Black Wires "Hot", 2 White Wires "Neutral", 1 Green Wire "Ground", and 4 low voltage control wires, 2 Pink wires and 2 Purple wires)

### BATTERY PACKS

Recyclable Ni-Cad battery pack, battery run time is 90 minutes. Recharge time of 24 hours. Battery packs up to 15W are available. To calculate Battery Lumen Output, multiply luminaire efficacy by battery wattage. (example: 120 lms/watt **(120) x B10 Battery Wattage (10) = 1200** lumens of egress illumination for 90 minutes.) Battery option not available in fixtures less than 4', and other limitations apply, consult factory. Entire "direct" fixture housing is energized by battery for lengths up to 5'. Half of direct fixture is energized by battery for 6' - 8' housing lengths. Emergency or night light circuit available (requires additional power circuit). Battery fixtures ship with an additional Orange "constant hot" wire.

### LUMEN MAINTENANCE

90% of initial light output (L90) at 100,000+ hours, 70% of initial light output (L70) at 200,000+ hours calculated.

### GENERATOR TRANSFER DEVICES

The GTD emergency lighting control device senses the loss of normal power and switches the AC driver input power connection to an unswitched, generator (or central inverter) supplied lighting circuit. GTD fixtures ship with 3 additional wires (Orange wire "constant hot", Black-Red wire "generator hot", White-Red wire "generator neutral").

### FIXTURE FINISHES

Standard finish is powder coat painted white (**WH**), black (**BK**) or silver (**SV**). Consult factory for custom colors as these options carry extended lead times and price adders to cover set-up and material costs.

### INSTALLATION AND MOUNTING

RXT-W is designed to mount to architectural wall surfaces. A rough-in junction box is required in addition to structural bracing within the wall for fixture support via factory provided mounting brackets. Wall mount, individual mount or continuous runs. Refer to installation instructions at <https://nulite.lighting/> for details.

### WARRANTY

5-year limited warranty on LED and driver from date of shipment. Refer to the full warranty details on <https://nulite.lighting/>.

### WEIGHT

Fixtures are 6.25 lbs/ft. Driver box weights vary per enclosure type and electrical configuration, consult factory.

### APPROVALS

Vandal resistant 1/4" thick lens has an IK rating of 08 with no exposed fasteners. Fully sealed gasketed lens and electrical fittings. ETL listed, conforms to UL Standard 1598 and CSA Standard C22.2, indoor dry/wet locations.

### TESTING AND CERTIFICATION

All of Nulite's LED components have been tested under **LM-80** guidelines ensuring 6000 hours of luminous flux data. Additionally Nulite can supply **LM-79** data on all luminaires. This data includes luminous flux, electrical power, efficiency, chromaticity as well as the diffusion of luminous intensity.
