MICROMILSPEC CELEBRATES IT'S 6TH ANNIVERSARY BY INTRODUCING THREE NEW COLOURED DUALTIMERS.

Oslo, Norway – 14.11.25 Micromilspec celebrates its sixth anniversary by introducing three new coloured versions of the Dualtimer — not an anniversary edition, nor a limited “look-at-me” release, but simply three perfectly balanced, perfectly coloured watches that embody the brand’s independent spirit.

The new **Dualtimer** models are available in Perfect **Blue**, Perfect **Green**, and Perfect **Sand**, each limited to an annual production of **25** pieces and priced from **€1,670**.

This launch reflects Micromilspec’s DNA: five years dedicated to custom professional watches, followed by one year of civilian editions. Over this period, the brand has produced more than 40 bespoke timepieces for specialist units — 38 of which featured black dials. To restore visual balance, the Dualtimer now appears in three fresh hues that bring subtle vibrancy to the collection while maintaining the functional precision Micromilspec is known for.

“Forget the obligatory five-year anniversary piece,” says Henrik Rye, Founder and CEO of Micromilspec. “We’re celebrating year six with a non-limited edition in the colours we’ve somehow avoided for half a decade — for reasons none of us can explain. This year has been about consolidating the Pilot Collection, following the success of the Field family launched last year. Since

MICROMILSPEC

August, it's quickly become our bestselling line. These three new colours are a celebration of doing things differently — with a touch of humour.”

Beneath the colourful surface, the Dualtimer remains true to its purpose-built core. Each watch is powered by the SW330-2 automatic movement, providing dual time zone functionality. For optimal legibility, the dial features two distinct Super-LumiNova X1 tones — blue for the bezel and GMT hand, and green for the main dial, hour, and minute hands — ensuring perfect visibility in all light conditions.

Each model is offered with a choice of stainless steel, rubber, or leather straps, allowing wearers to adapt the watch to their environment, whether cockpit, office, or weekend getaway.

Micromilspec continues to build its legacy as an independent Norwegian watchmaker, creating timepieces for professionals who value authenticity, precision, and a hint of rebellion.

MICROMILSPEC

MICROMILSPEC

rubber strap

MICROMILSPEC

ABOUT MICROMILSPEC

Established in 2019, MICROMILSPEC is an independent Norwegian watchmaker specialized in "made-to-order" watches for military, first-responders and special clients.

Watches are designed and developed in Oslo, while manufacturing and assembly are handled by a network of trusted partners in Switzerland. Working closely with some of the industry's leading manufacturers and specialists, all projects are executed with technology, materials and quality that is usually considered beyond the scope of most independent micro- and boutique brands.

Other MICROMILSPEC projects include:

- Canadian, Norwegian & French Special Forces.
 - U.S. Space Force
 - His Majesty The King's Guard (Royal Guards battalion of the Norwegian Army)
 - 330 Squadron (SAR helicopter unit of the Royal Norwegian Air Force)
 - SAR Canada
 - Fridtjof Nansen-class frigates (naval combatant units of the Royal Norwegian Navy)
 - Telemark Battalion (mechanized infantry unit of the Norwegian Army)
 - Armoured Battalion (infantry unit of the Norwegian Army)
 - 2nd Battalion (infantry unit of the Norwegian Army)
 - Smoke Divers unit of the Oslo Firebrigade.
 - Asymmetrical Warfare Group (American anti-terror unit)
 - Swedish 323rd Parachute Ranger Squadron
-
