MICROMILSPEC DEBUTS THE PILOT WORLDTIMER AT GENEVA WATCH DAYS

MICROMILSPEC LAUNCHES TWO NEW WORLDTIMER MODELS IN PILOT COLLECTION AT GENEVA WATCH DAYS

Now part of the brand's permanent collection, the new models start at EUR 3,500 and will be limited to 75 pieces each in this year's Annual Collection.

Geneva, 04.09.2025 – At this year's Geneva Watch Days, MICROMILSPEC welcomes two new Worldtimer models as part of its all [new Pilot Collection](#); a family of aviation inspired tool watches that mark the brand's second official appearance at the event.

The new models, available in black and white dial configurations, feature a chronograph complication, GMT hand, and a worldtimer display. Housed in a Grade 5 titanium case and fitted with a ceramic worldtimer bezel insert in two finishes, luminous indexes and hands, and a discreet date window at 3 o'clock. Powered by the Manufacture La Joux-Perret L122 movement, the instrument inspired aesthetic reflects the precision, utility, and modernity synonymous with the MICROMILSPEC name.

These launches come at a pivotal moment for the brand, celebrating its expansion into international markets over the past 18 months. The Worldtimer serves as a nod to MICROMILSPEC's growing global presence, now available through select retailers around the world.

Following the success of last year's [Milgraph](#) and the introduction of the Land Collection, this year's focus shifts to the skies, reflecting the brand's continued dedication to creating purpose driven tool watches for professionals and collectors alike.

"Returning to Geneva Watch Days is a highlight we look forward to each year. It's the perfect opportunity to connect with press, collectors, and enthusiasts who share our passion for horology. With the introduction of a new family to our lineup, we hope to recreate the same excitement we saw last year."

— **Henrik Rye**, Founder, MICROMILSPEC

REACHING NEW SKIES

Micromilspec makes watches for professionals, creating unique timepieces for squadrons, private companies, and individuals. Over the years, we have developed several pilot watches, including the Hercules, made for the Royal Norwegian Air Force, and the Sentry, created for personnel connected to **NATO's AWACS program**. Micromilspec has developed aviation themed models for specific squadrons, but never as a standalone, permanent collection. With the brand now in its second year of public sales and returning to Geneva Watch Days, its collection is beginning to take shape. The Pilot category is set to become a defining part of the Micromilspec family

ABOUT MICROMILSPEC

Established in 2019, MICROMILSPEC is an independent Norwegian watchmaker specialized in “made-to-order” watches for military, first-responders and special clients.

Watches are designed and developed in Oslo, while manufacturing and assembly are handled by a network of trusted partners in Switzerland. Working closely with some of the industry’s leading manufacturers and specialists, all projects are executed with technology, materials and quality that is usually considered beyond the scope of most independent micro- and boutique brands.

Other MICROMILSPEC projects include:

- Canadian, Norwegian & French Special Forces.
- U.S. Space Force
- His Majesty The King’s Guard (Royal Guards battalion of the Norwegian Army)
- 330 Squadron (SAR helicopter unit of the Royal Norwegian Air Force)
- SAR Canada
- Fridtjof Nansen-class frigates (naval combatant units of the Royal Norwegian Navy)
- Telemark Battalion (mechanized infantry unit of the Norwegian Army)
- Armoured Battalion (infantry unit of the Norwegian Army)
- 2nd Battalion (infantry unit of the Norwegian Army)
- Smoke Divers unit of the Oslo Firebrigade.
- Asymmetrical Warfare Group (American anti-terror unit)
- Swedish 323rd Parachute Ranger Squadron
