

SHAHNAZ RAIHAN SUMMY

ABOUT ME

I am a BSc. (Engg.) student in Computer Science and Engineering at Independent University, Bangladesh. I am enthusiastic about coding and graphic design, and I am a member of STEMclub, the university's STEM community. Since the sixth grade, I have been involved in both computing and social work. I am a founding member of both Project Banolota and the Health and Hygiene Olympiad, where I served as CEO, co-founder and managing director, respectively. I have also served as the General Secretary for the Arise Help for Child Foundation (AHC), where I supported underprivileged children and communities by providing education, sanitary napkins to rural women, and COVID-19 relief efforts.
