

ONIX Pickleball Launches Four All-New Raw Carbon Paddles

PRESS RELEASE • APR 24, 2023 10:00 EDT

ONIX announces the newest raw carbon surface pickleball paddles

EVANSVILLE, Ind., April 24, 2023 (NewsWire.com) - ONIX Pickleball, the pickleball manufacturer committed to you playing your best with the most technologically advanced equipment, is thrilled to announce its newest additions to their paddle lineup. The Evoke Premier family introduces four new types of paddles, the [Evoke Premier Pro Raw Carbon 10](#) and 12 and the Evoke Premier Raw Carbon 14 and 16. All four paddles feature a raw carbon fiber surface texture, which increases traction on the pickleball for maximum spin and control without sacrificing pop and power.

Each paddle's polypropylene core provides a lightweight and durable paddle for play with excellent all-around maneuverability. The lightweight pickleball paddles also are constructed with a non-slip, comfort grip that makes it easy to control on the court. These paddles are USA Pickleball (USAPA) approved for tournament play. A full edge guard provides added protection during aggressive play.

"We are thrilled to announce the launch of our four Raw Carbon Pickleball Paddles to our list of ONIX paddles," says Jay Simmons, ONIX Pickleball Product Manager. "Our champion pro pickleball players Matt Wright, Lucy Kovalova, Callie Jo Smith, as well as many others, play tested these paddles and provided key input before the release. Now we can't wait to see these new raw carbon paddles in more tournaments everywhere."

The 10mm paddle has a 5" polypropylene core handle length and 4" handle circumference that provides aggressive power and spin. The paddle weighs approximately 7.6-7.9 oz. and

has the most power or pop of the entire line of new raw carbon paddles. The 12mm paddle with a 5" polypropylene core handle length and 4" handle circumference offers aggressive power and spin. It weighs approximately 7.6-7.9 oz. and has great power with more control than the 10mm. The 14mm paddle has a 5.25" polypropylene core handle length and 4 1/8" handle circumference that gives aggressive power and spin. It weighs approximately 7.9-8.3 oz. and has more control and somewhat less power than the 12. The 16mm paddle with a 5.25" polypropylene core handle length and 4 1/8" handle circumference provides aggressive power and spin weighing approximately 7.9-8.3 oz.
