It all starts with an idea.

The Stand Out

There are a number of special qualities that brought Koncept to where it is, but we firmly believe that our designs pioneered the way. Our award-winning rubric consists of two core principles – [form & function](#). These principles serve as tools for our designers where their contemporary, minimalistic, and innovative expression actualizes the LED lighting solutions you see today. Koncept is a place of creators, that not only invent their own designs, but manufactures them as well. Koncept lights strive to be an embodiment of originality.

Family of Designers

Based in Los Angeles, California, Kenneth & Edmund Ng, University of Southern California and Stanford University graduates, began Koncept with their father and industrial designer, Peter Ng in 2002. This family of designers have accumulated over 60 international awards & counting for their works in LED lighting design. Koncept has been featured in major press like TIME Magazine, CNBC, and Architect Magazine acknowledging their works. One design in particular, their flagship Z-Bar, has a permanent installation at the Die Neue Sammlung Museum in Germany, as one of the best innovation’s of the 21st century.

Sustainability Mission

With Koncept’s position within the LED designing world being well-established for over 20-years, it is our desire to bring our lighting solutions to everyone – individuals and companies alike. We believe that one should never have to sacrifice unique design and functionality for the sustainability that LED lighting delivers. Koncept lights are a proven way to unify these aspects together, as we aim to help projects achieve their LEED certification, or simply help individuals live a greener life.

tangerine

www.koncept.com/tangerine

Join us as we raise awareness and funds for appendix cancer research in our Tangerine program. Our efforts are in honor of our beloved Koncept team member, Tony Quach, who passed away from this disease in October 2017.

About Appendix Cancer

Appendix cancer has many forms and is a relatively rare disease: fewer than 1,000 Americans are diagnosed annually and due to a lack of resources, oncologists often misdiagnose this disease as colon cancer.

Together We Can Make a Difference

The Hillman Cancer Center at the University of Pittsburgh Medical Center is the only site that has a comprehensive appendix cancer research and treatment program. Dr. Mohammed Haroon Asif Choudry, surgical oncologist at UPMC Hillman Cancer Center and an associate professor of surgical oncology, leads this research.

Inspired by their efforts, Koncept donates 5%* of every orange lamp sold, directly to Dr. Choudry's research.

You can visit <https://hillman.upmc.com/difference/supporting> to find out more ways to offer support.

* 5% of gross proceeds from every orange lamp sold at dealer NET

About Koncept's Tony Quach

Tony Quach started working at Koncept in October 2009 as a warehouse associate. Later, with his refreshing spirit and dedication, Tony was eventually managing all logistic operations for Koncept. Then in March 2016, Tony was diagnosed with appendix cancer. Even after multiple surgeries and rounds of chemotherapy, this aggressive form of cancer spread rapidly. At the age of 31-years-old, Tony passed away peacefully at home, surrounded by his loved ones, on October 25, 2017.

“Tony was our core team member, our companion, our friend, our brother and our go-to person for almost everything. He provided great leadership and great help to others. He provided solutions to resolve issues for us many times, and not just in his official capacity as Warehouse Manager. Tony possessed great personal characters. He was reliable, kind-hearted, funny and honest. Tony was the comedian of our team: he always had great stories and jokes that brought smily faces to our work. Tony was our friend and ally. He worked alongside us and many others to make Koncept a better place. He will forever be part of us, his memory will be remembered, and his love will never die.”

Z-Bar Titan

floor lamp

By Kenneth Ng, Edmund Ng
2025

The Z-Bar Titan floor lamp combines elegance and functionality with ease. Despite its large 78" width and up to 84" height, it offers incredible flexibility. A smart mechanism allows feather-light adjustments with just one finger, while the rotatable LED head and base provide versatile lighting options. Its minimalist design seamlessly fits into any space, making it a stylish and adaptable lighting choice. The rotary switch enables smooth brightness control, creating an effortless lighting experience. The Z-Bar Titan floor lamp is the ultimate blend of style, function, and versatility for any setting.

Z-Bar pendant Bird

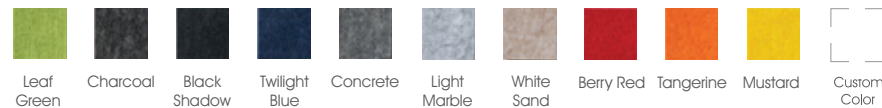

Acoustic panels

Compatible with multiple Z-Bar Pendant models, Koncept's line of acoustic panels are an attractive solution to sound absorption. Panels are available in ten different finishes to complement your room's acoustics and aesthetics. They can be mounted flat onto each pendant or upright along the suspending wires, for a three-dimensional look.

Royyyo

pendant

By Kenneth Ng, Edmund Ng
2017

The Royyyo Pendant adds a simple yet elegant flair to any space. Its clean and modern silhouette houses a complex wiring system. The circular design casts a bright and even light. Combine multiple Royyyos in a linear or circular configuration for a stunning focal point, or hang just one for a minimalist statement.

Diffused light

Sub pendant

Red Dot Design Award 2019

By Kenneth Ng, Edmund Ng
2018

The Sub Pendant emits a soft, warm glow from a contemporary profile. A continuous line of LED light wraps around each pendant, allowing this masterpiece to function as both a task light for surfaces and ambient light for ceilings. Available as a single pendant or circular configuration of multiple pendants, the Sub can adapt to minimalist or maximalist environments.

Combi

pendant

Best of NeoCon Silver 2022

By Kenneth Ng, Edmund Ng
2022

Build your pendant according to your space with the Combi pendant and its make-it-your-own design to mix-and-match components. The core light is a 1.5" cylinder, extending to either 6", 12", 16", 24", or 36" in length, where you can keep the cylinder as is, or enhance it with a variety of Combi attachments like stained glass, metallic plates, acoustic panels, or sleek snoots. Be in control, and unlock your perfect combinations.

UCX pro

undercabinet light

Best of Neocon GOLD award 2015
BUILDINGS Product Innovations 2015

By Kenneth Ng, Edmund Ng
2015

This undercabinet light emphasizes intuitive control and sleek, minimalist design. Multiple UCX Pro light bars can be easily connected with daisy-chain cords. Control the UCX Pro's light color and brightness settings with the touchstrip control or with the optional wifi module and smart phone app. Schedule your light to automatically change in intensity and light color throughout the day to synchronize with your circadian rhythm.

Under Cabinet

Z-Bar

wall sconce

By Kenneth Ng, Edmund Ng
2018

The Z-Bar Wall Sconce can be utilized to highlight a framed picture, a piece of art or a mirror. Mounted solo, it can be appreciated as its own work of modern art. It can be hung horizontally, vertically, even diagonally on a wall or ceiling. The slim LED bar is rotatable, allowing users freedom to direct the light. The sconce comes in four sizes, the smallest of which can be mounted at the end of the light bar as well as from the middle.

Gravy

wall sconce

Good Design award 2016
SPARK Design award 2015

By Kenneth Ng, Edmund Ng
2016

This quirky wall sconce has captured the imaginations of designers around the world. The swiveling shade shines diffused light where it's needed. Simply tap the center of the LED head's underside to turn on or off, and hold to adjust the brightness. A wide selection of magnetically-attaching plates are available to match your interior spaces perfectly. A paintable plate opens up infinite customization opportunities.

Ramen

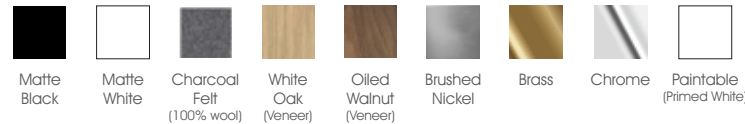

wall sconce

Chicago Good Design Award 2020

By Kenneth Ng, Edmund Ng
2019

Ramen is a playful circular sconce suitable for indoor or outdoor use. At either 9" or 12" in diameter, the magnetically-attached face plates are interchangeable. A paintable plate opens up opportunities for designers to match Ramen with wall colors or paint patterns, images, etc. Ramen's bowl-shaped body emits 360° of beautifully diffused light.

Compatible with new Back Dish (see koncept.com/Ramen-BackDish)
Wet rated for indoor or outdoor use
Face plates are interchangeable
Paintable plate option maximizes opportunities to customize

Ramen w/ back dish

By Kenneth Ng, Edmund Ng
2023

The Ramen with back dish is an enhancement and transformation of the Ramen wall sconce allowing the Ramen to serve as both a ceiling light or a wall light. With the Ramen's back ambient glow & interchangeable plates, this back dish is not simply additive, but completes the Ramen's assemblage by adding a decorative element that directs the emitted light into a forward-facing radiance.
