We believe in the power of light to create atmosphere

LIGHTING OUT OF THE ORDINARY

RBW's forward-thinking, technology-driven design approach invents lighting solutions that are out of the ordinary—statement pieces that take on unprecedented shapes, or staple pieces that make subtle upgrades on familiar forms. Listening closely to the needs of our customers, we engineer intuitive systems that are easily modified to fit a range of applications.

And as thorough stakeholders in our customers' success, we back our products with diligent, knowledgeable service. Expert specialists are always on call to talk through the finer details of color temperature, the science of dimming, and more. Whatever the topic, we're happy to chat.

INTRO

Light is a powerful thing. At RBW, we believe in the power of light to create atmosphere — to enliven the little things, like our morning routines, or the moments we spend with friends. We believe that light helps shape our well-being and improves everyday life. Light can fill a room with a sense of optimism. It can energize and motivate. And at the end of the day, it can help us relax and unwind.

As an award-winning, independent design and manufacturing company based in Industry City, Brooklyn, RBW is a brand for architects and designers looking for a higher quality of light. Our forward-thinking products provide sustainable alternatives to traditional lighting systems, embracing new energy-efficient technologies and renewable materials. Each collection embodies a distinct personality while upholding the hallmarks of RBW's family DNA: Intuitive ease and simplicity. Integrity of craft and material. High-quality lighting with an expressive point of view.

Driven by an ethos of social and environmental responsibility, we are a certified [B Corporation](#), a new kind of company that aspires to make not only a profit, but also a positive, lasting impact on our stakeholders, our customers, and our planet. To learn more about our B Corporation status, including our ongoing community initiatives and waste-reduction methods, please visit the [Sustainability](#) section of our website.

STRIKING A BALANCE

“For me, what creates a successful, well-lit space is a balance of ambient light, task lighting, and a play with brilliance,” says designer Little Wing Lee, a longtime customer, collaborator, and friend of RBW’s. “With RBW’s fixtures, you have a choice in the color temperature of the lighting, as well as the kind of color for the fixture itself... All of these little elements are like the jewelry that brings texture into the space, and draws your eye to different parts of an interior.”

AllSew

Our modular, scalable pendant inspired by the luminosity of lanterns, and the lightweight, collapsible efficiency of kites. Use it solo, or in multiples: AllSew is a flexible workspace hospitality solution suitable for a variety of indoor applications, and engineered to high-performance contract standards.

Available in pendant in 2 sizes

Cuff

A captivating collection of refined detail and timeless sophistication, created in collaboration with Little Wing Lee. Cuff's meticulously crafted shade showcases the rich texture of sand-casted metal and brass, adding a touch of opulence to any space.

Available in [sconce](#)

Cape

Designed in collaboration with Little Wing Lee of Studio & Projects, Cape is a modern ode to maritime design—a refined exploration of nautical light—where distinctive geometry, playful expression and high-performance lighting technology come together.

Available in 2 sizes, in sconce, ceiling flush mount

Copia

A collection that showcases the innovative use of unique materials, created in collaboration with Little Wing Lee. The dynamic glow of Copia's layered design inspires moments of joy and adds a sense of playfulness to any environment.

Available in [sconce](#), [ceiling flush mount](#)

Crepe

Crafted entirely from glass, the Crepe collection creates a mesmerizing depth of light and form with a layered diffuser and shade. This collection is created in collaboration with Little Wing Lee.

Available in 3 sizes, in [sconce](#)

Topo

Topo's elegant construction is both minimal and inviting, seamlessly joining an elliptical glass bulb to the unique visual textures of our circular backplate. Offered in a selection of rich earth tones ranging from Clay to Basalt, the backplate radiates with warmth as the light illuminates the organic patterns on its surface.

Available in 2 sizes, in [sconce](#), [ceiling](#), [flush mount](#)

Glyph

Designed in collaboration with the acclaimed Yabu Pushelberg studio, Glyph sconce embraces the gestural simplicity of glyphs—symbols that compact meaning into a minimal graphic form. The collaborative design comprises two vertical panels joined at 90 degrees that form two halves of a whole—an intersection of contrasting colors and textures, as well as distinct shadows that complement a soft diffusion of light.

Available in [sconce](#)

Vitis

Designed so that no two installations are exactly alike, Vitis, is a draped modular statement chandelier with endless customizable possibilities. Its flexible, translucent cables accommodate 1, 3, 5, or 7 blown-glass orbs at various heights, giving the appearance of lights floating in space. Orbs of smooth matte glass come in an Ivory white finish with a clear polish interior; a clean sightline through the barrel of the orb reveals a new level of interest to the glowing bead.

Available in [chandelier](#)

Branch

Perforated metal shells sit comfortably atop diffuser lenses, in this family of lights. This fixture is available in a variety of warm anodized finishes and warm color temperatures, adding atmosphere to any space.

Available in sconce, pendant

Palindrome

Sculptural and malleable the contortionist Palindrome was built to adapt to its environment. Each installation is unique, thanks to the modular composition of its tubular steel arms. They rotate to the custom configuration dictated by the size and shape of a space, and the light itself adjusts to mirror corresponding moods.

Available in [chandelier](#)

Hoist

Having identified the out-of-reach electrical outlet as a routine problem, the studios adapted the standard electrical cord as an integral, stylish component of Hoist's overall design. Swagged and offered with generous cable length, the cord allows greater opportunities for where a pendant light can be installed.

Available in sconce, pendant, ceiling flush mount

Pilot

Inspired by organic forms, each branch of the Pilot chandelier features a rounded, shell-like shade. Available in a range of colors, lengths, and finishes, the compositions of these branches are a sculptural exercise; options range from a linear beam suited to the long dining table, or an elaborate starburst ideal for a grand foyer.

Available in chandelier in 1, 2, 3, 4, 5 tiers

Print

A prismatic textured shade developed by acclaimed designer Sylvain Willenz encloses high-performance LEDs in Print's versatile, elevated take on the classic globe light.

Globe available in 2 sizes, glass and frosted PET material

Available in [sconce](#), [pendant](#), [ceiling flush mount](#)

Cinema

The Cinema Chandelier makes a bold statement with minimal effort, featuring a simple circular frame in a rich metal or powder coated finish embellished by the warm glow of opal glass fixtures. Evocative of Old Hollywood's charm, Cinema's theatrical features are customizable to various compositions: The rings are available in stackable 4, 6 or 8 foot diameters.

Available in [chandelier](#) in 1, 2, 3 tiers

Radiant

As an upgrade to our best-selling Radiant scone, the new Radiant creates a diffuse halo of light, pairing minimalist design with the texture and warmth of solid, sustainably harvested-wood. The new collection now offers more options for customizing the scone's simple wooden shade, with two shapes, three sizes, and four finishes to choose from.

Available in [sconce](#)

Latis

Inspired by the laid-back atmosphere of the modern workplace and engineered with versatility in mind, Latis's intelligent, fail-safe design easily adapts to a wide range of spaces, looks, and architectural conditions. Evocative of a structural I-beam, its deceptively minimalist profile packs robust performance capabilities into RBW's new optic platform.

Available in [pendant](#)

Queue

Queue is a linear LED pendant system with limitless potential, designed for flexible installation and an inviting presence. Units can be oriented either upwards or downwards in order to cast respective soft or direct lighting. Originally conceived as an answer to the monotony of workplace systems, Queue exudes a welcoming light and rich beauty in the subtle, rounded facets of its surface. Ultimately, the finished product goes as well in a bar or dining room as it does in the office.

Available in sconce, pendant

Highline

RBW partnered with industrial designer Jonas Damon to create Highline, an adaptable, easy-to-install system that marries the flexibility of a linear fixture with the thoughtful design of a decorative pendant. Highline's slim, suspended beam pairs with three distinct fixture options. Choose the sleekness of the cone pendant, the versatile dual-axis swivel of a spotlight, or the warmth of the felt shade made from 90% post-consumer fibers. Pair with a linear uplight that casts a diffuse glow.

Available in [pendant](#)

Centro

Centro, a sleek, circular fixture for both flush mount and pendant installation. Centro works well in bathrooms and kitchens applications, also ideal for corridors. With its slim profile and light-diffusing perforated edge, Centro possesses a subtle sophistication other fixtures don't.

Available in [pendant](#), [ceiling flush mount](#)

Spool

Spool delivers an acoustic performance element while taking up a sculptural presence in any space, especially in groups. Using a variety of optic configurations, Spool finds its elemental niche in your designs. Add one or a cluster to make a signature interior statement.

Available in pendant in 4 sizes

Lifestance Health Office — Westerville, OH

Gala

Gala is a minimal, near-weightless take on the chandelier, rethought as a simple beam with power cords hidden inside the slim suspension cables. Its ivory-frosted glass fixtures, fixed in a variety of compositions, bring to mind hanging fruit. Voluptuous and handblown, each orb is subtly unique.

Available in [pendant](#), [chandelier](#)

Mori

This super simple, organic, glowing pendant is distinguished by its pared-down silhouette. A simple cross-wire frame is fully cocooned in woven threads, then sprayed with a matte lacquer finish. The resulting built-in shade emits a lantern-like, ambient light, ideally installed in groups of two or three.

Available in pendant, sconce, ceiling flush mount

Akoya

Akoya's perforated shade shell proudly reveals a glass pearl bulb. This pendant light drops elegantly, exuding a warm LED glow and is best above a dining table, or strung together in a row.

Available in [pendant](#)

Dimple

Originally designed in collaboration with Sister City for a custom fixture version featuring clear glass and a white-painted interior, Dimple is a compact and dimmable, flush-mounted sconce that casts a diffuse and soft, atmospheric light. Made from solid-cast glass and an anodized aluminum backing, Dimple is cheekily named for the thick, domed circular diffuser embedded into its front face. This unique feature renders its LED source into a soft, atmospheric glow that emanates an orb-like, optical pattern.

Available in [sconce](#), [ceiling flush mount](#)

LIGHTING OUT OF THE ORDINARY

RBW prides itself on being a different kind of design brand, one that oversees all aspects of production under one roof—from ideation and design to specification, manufacturing, marketing, and shipping. And from the beginning, working directly with the designers and architects who buy our products has been an ongoing source of inspiration. Our best-selling Crisp, for example, was inspired by our customers' frustrations with the market's outdated selection of flush-mounted lighting. Eschewing synthetic materials and complicated parts, we came up with a contemporary sconce unlike any we had seen before: a simple LED with an aluminum backing, paired with the heft and integrity of a rippled, solid-glass lens.

When we incorporated RBW in 2009, our goal was to create a brand that would not only change the game of lighting design, but also make a positive impact on both the planet and our community. In the Sustainability section of our website you can read about our status as a B Corporation, a purpose-driven company that upholds the highest standards in social and environmental accountability. You can also read about our ongoing progress in cutting our carbon emissions, as well as our investments in our community, which to us includes our customers, employees, vendors, and neighbors—partners in our ongoing journey of exploration, discovery, and improvement.

Crisp

As a versatile flush mount, Crisp's simple, iconic design is suitable for both wall and ceiling installation, indoors and outdoors. The solid glass shade, offered in a range of finishes, is distinguished by its scored surface, adding a subtle textural detail to the environment.

Available in [sconce](#), [ceiling flush mount](#)

Chip

Chip is a surface-mounted fixture with the familiar grooves that extend the surface area its light can reach. Scoring Chip's clear, solid glass body and painted interior, the grooves also add a textural quality to its minimalist design. Chip is suitable for installation as a bathroom vanity light or outdoors, as well as in foyers and corridors.

Available in [sconce](#)

Ripple

Ripple's unique texture of raised, concentric rings brings to mind ripples coursing along the surface of water.

Available in [sconce](#), [ceiling flush mount](#)

Brim

Brim is a minimal, customizable, multi-directional sconce equipped with a swiveling head and simple, column-like shade. The fully interchangeable shades are available in circular, square, or faceted formats, each designed to highlight different features of an array of finishes. On/Off toggle switch and power cord optional.

Available in [sconce](#)

Phase

Phase recalls the lunar cycle, this wall-mounted, cast-glass spherical sconce emits a bright light.

Available in [sconce](#)

Notch

Notch casts light from the top or bottom, and from its core. In addition to enhancing the aesthetic qualities of the fixture itself, the contrasting finishes on the interior and exterior also improve the light; as the LEDs reflect off of the interior surfaces, they pick up some of the color and shine, adding nuance and depth to the overall environment.

Available in [sconce](#)

Ledge

Ledge's beauty lies in the economy of its form. The lightweight metal sconce measures in at roughly a 3/8 -inch thickness and consists solely of two pieces: the solid-cast body with integrated heat sink, and an opaque PMMA lens to diffuse the LEDs inside.

Available in [sconce](#)

Monocle

Monocle, a sleek, rotating sconce, with dimming control at the touch of a finger. Touch to cycle three levels of light, on, and off. Monocle's pleasantly round demeanor and touch dimmer makes it an ideal lamp for a bedside or workstation. Durable and damp-rated, however, it works well in many applications: under outdoor overhangs or in the bathroom vanity.

Available in [sconce](#)

Pastille

With the bold geometric patterns of its glass surface accented by metal backings, Pastille's design echoes Art Deco sensibilities. RBW offers custom, hand painted signage that can be applied on the globe surface or backplates.

Available in [sconce](#)

Witt

Witt is a modular, geometric take on the traditional chandelier. They can be hung in a linear procession, both horizontally and vertically; as a cluster; or at staggered heights. The sets of five can also be combined to a customized scale. The ultra-slim suspension cables are near invisible, leaving the focus on the composition.

EASE OF SPECIFICATION

Using the latest in digital tools, we simplify the process of ordering, specifying, and installation. Our products can meet the specifications of your project with a few clicks on our intuitive digital platform. Independently tailor the composition, scale, color, and finish to suit the specific conditions of your space. Enhance your experience further with tools like Create a Project and our Trade Program.

FINISHING SAMPLES, DELIVERED TO YOU NEXT DAY

Across our Finish Library's select range of metal platings, powder coats, anodized aluminums, and more, each option was thoughtfully considered to tell a story through color and texture. Moods range from the classic warmth of our Mottled Brass plating to the pop of our glossy Vermilion powder coat, with sample swatches promptly delivered next day. For custom finishes, our team of color experts will happily match the finish that fits your project like a glove.
