A-N-D is a decorative luminaire design studio and manufacturer based in Vancouver, Canada where original collections are conceptualized, built and assembled in-house.

A-N-D investigates new design possibilities using innovative production methods while integrating the most current technologies in lighting. The result of that exploration puts forward honest products that transcend time and place. In pursuit of the visually poetic, we're inspired by the unexpected and the everyday; drawn to the capacity of light to shape and animate space.

COMPLETE COLLECTION

COLUMN grows and increases its commanding presence in a room, given its commutable quality.

VECTOR directs light to wash down its inner sloped surfaces as several panels are fitted together to create a slender rectilinear section.

IRIS is encased in an elliptical shell, an orb-like glow extends from its crystalline surface.

PEBBLE celebrates the primordial beauty of stones, enhancing their simple yet sculptural form through translucency.

LOBE celebrates the poetry of mechanics and articulates the stacking of three irregular-shaped cylinders.

PIVOT is playful and interactive as its balancing shade allows for easy adjustments.

COMPLETE COLLECTION

PIPELINE is modular and scalable as its kits of parts enable it to respond to the contours of any given space.

SPOTLIGHT is based on five unique shade profiles, expressing symmetry, balance and proportionate form.

VALE optimizes functionality through its multidirectional luminescence while diffusing soft ambient light.

SLAB offers a visually distinctive tactile experience as well as soundproofing properties to reduce ambient noise.

VINE combines exaggerated form with repetition to create a scalable fixture.

ORBIT shows a sphere enclosed in a wire cage.

BUTTON boldly plays on the archetype, with a wide circular LED surface and rope threading.

VOL. 24

COLLECTION

VECTOR

A slender rectilinear section is cut from precise paths so that several panels are fitted together to create the Vector. Light is directed to wash down its inner sloped surfaces, proffering a gradient effect.

COLUMN

The faceted surface of the Column mimics the fluting used on buildings and temples to create a sense of rhythm, which softly diffuses the light as it radiates into the space.

PIVOT

The Pivot series is an invitation to shape light. Balanced on an opalescent globe, the shade articulates on the light source itself and can be manoeuvred to cast light towards a desired direction.

PIPELINE

The Pipeline series begins with a linear LED light, elegant in its simplicity; the scale of the fixture expands by multiplying the modular pendant to create an infinite range of tailored lights that respond to the contours of any given space.

PENDANT

COMBINATION (CM)
Flexibility is introduced to the system through the use of various elbows and straight connections between lengths. CM1–9 are some common combinations.

PIPELINE

184

PIPELINE CHANDELIER 9, BLACK

By definition, the Pipeline Chandelier features a cylindrical arrangement of linear illuminated sections cinched by metal hoops. Its carousel-like form proposes an unconventional lighting solution; one that radiates from its concentric structure.
