

NUURA

“Natural light is essential to all life. Current research on the biological effects of light shows that it affects our mood and energy level, and that it has a significant impact on our well-being and health. Consequently, awareness around decorating both public and domestic spaces with quality light is increasingly on the agenda to promote well-being”.

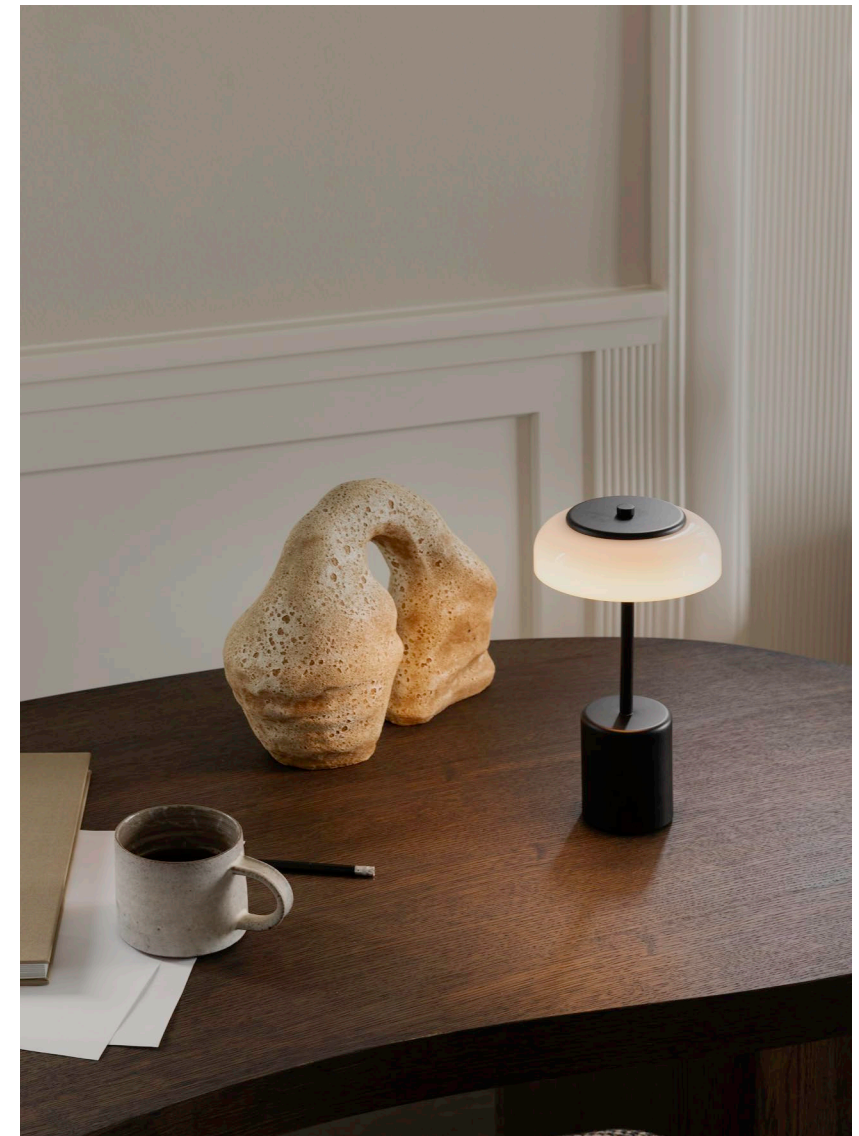

Sofie Refer, Creative Director, Nuura

ABOUT

With the chandelier as a centre, we offer lighting collections that enrich and complete the decor in private homes and public places. The chandelier expresses generosity and abundance. At Nuura we aim to reinterpret the chandelier, building on the Nordic design tradition. Using new technology and carefully selected materials, we strive to create aesthetic lighting that is beneficial to our well-being. Around the chandelier we unfold entire collections of lamps, spanning from single pendants to larger chandeliers. Each lamp within a family of light features differences yet commonalities with the other lamps in the collection, maintaining the variation and repetition as seen in nature. The product families offer the possibility to create coherence and calmness in the lighting design of a room. With inspiration from Nordic nature, we aim for a simple, yet sensuous expression making use of organic shapes and natural colours – this is our way of honouring nature and light.

MIIRA

The Miira collection features a simple and timeless design. The neatly mouth-blown glass and processed metal create a balanced and deep expression. The collection revolves around the chandelier and includes a series of lights. It is suitable for various contexts, from private homes to larger interior decorations and projects.

LIILA

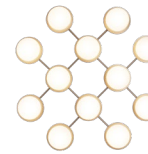

The Liila collection is created around the modular wall chandelier, Liila 12. The idea behind the collection is to create wall and ceiling lighting, with glass as the focal point. The mouth-blown glass globes are mounted on metal discs, giving the glass a floating appearance and creating lighting with references to the summer sun. From the collection's centrepiece, the series unfolds into smaller wall chandeliers and single lamps for the wall and ceiling.

SASI

The Sasi collection features a delicate sense of aesthetics, soft design language, and the use of round and harmonious shapes. The larger, rounded lampshade is made with a satin finish to carry and emphasize indirect light, while the lamp's smaller shade creates detailed reflections of the surroundings and light in the room due to its mirror effect. The subtle contrast in surface finish from the larger to the smaller shade is a crucial design motif in the collection. The integrated LED light source also provides high-quality lighting and is easy to replace.

RIZZATTO

Paolo Rizzato, an internationally renowned architect with a long and distinguished career in lighting design and a fascination with chandeliers, created the Rizzato collection. His inspiration came from Oskar Schlemmer's 'Triadisches Ballett' from 1924. The light unfolds from its source and diffuses through the mouth-blown opal white glass, creating soft and comfortable quality lighting.

APIALES

The Apiales collection draws inspiration from flowers and childhood memories. It includes single pendants, wall lamps, and chandeliers with 6, 9, or 18 mouth-blown glass globes. The chandelier's arms unfold like flower stalks from a specially produced canopy. The collection is carefully crafted without visible screws or welds. With different sizes and variants, it is suitable for various uses in private homes and public spaces.

BLOSSI

The Blossi collection draws inspiration from the golden light of autumn, where sunlight reflects on colourful leaves in the forest bed. Blossi is designed to provide a warm and delicate light. The rounded mouth-blown glass shade and simple expression draw on motifs from the Nordic design tradition. From the chandelier, the collection evolves into wall, table, and floor lamps. A specially developed LED disc is positioned to reflect light in the mouth-blown glass shade, creating a soft and indirect light.

ANOLI

The Anoli collection is inspired by the serene beauty of raindrops on a rainy September day. The series features carefully crafted droplets and a warm expression. It comprises neatly mouth-blown glass pendants, hand-painted with a unique lustre to give the glass its golden colour. The inner part of the pendant, where the light source is placed, is designed to resemble a droplet, highlighting the mouth-blown glass design. The collection includes single pendants and chandeliers that can be customised for private homes and larger, exclusive projects.

THE DESIGNERS

SOFIE REFER

Sofie Refer is an internationally acclaimed Danish lighting designer. Her work is deeply rooted in the Scandinavian design tradition, reverent to nature and the elegance of simplicity. While honouring tradition, she looks to challenge modern perceptions, keenly exploring the bounty and benevolence of her surroundings, which she translates into her lighting designs.

PAOLO RIZZATTO

With a long and distinguished career in the field of lighting, and a fascination for chandeliers, the Italian architect Paolo Rizzatto has designed the Rizzatto collection for Nuura. Paolo Rizzatto was born in Milan in 1941, where he studied for his degree in architecture at Milan Polytechnic in 1965 when he was 24. Rizzatto works as a freelance in the fields of architecture, interiors, design, lighting, and teaching. He founded Luceplan together with Riccardo Sarfatti in 1978.

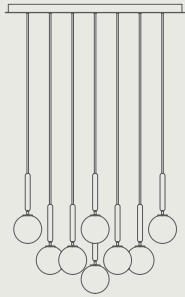

RICK TEGELAAR

The Dutch designer Rick Tegelaar has a creative process of redefining materials and developing innovative product designs, which has formed the Sasi collection for Nuura. Rick Tegelaar was born in Rotterdam in 1986 and graduated with honour in product design from ArtEZ Academy, Arnhem in 2011. Since then, he has worked as an independent designer from his atelier and design studio, working on self-initiated and commissioned bespoke projects.

DETAILED PRODUCT OVERVIEW

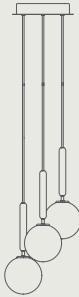

MIIRA 13

Dimensions ø36.2in x max. 98.4in
Glass dimensions ø5.5in
