

# Aquatiq®

## Aqua series

The Aqua series from Aquatiq is a professional range of detergents and sanitizers that are specially designed to solve the challenges in salmon processing areas.

The products in the range are developed over years together with our customers and are recommended and used by the largest salmon producers in the world.

Available sizes:  
Canister / Drum / IBC

### Objects

### Benefits

### Facts

#### Detergents

- All open surfaces, such as processing equipment, machines and disassembled parts and equipment
- Blade and box washing units
- In circulated systems and enclosed areas such as pipes and hoses
- RSW vacuum and refrigerated systems.
- We also have products suitable for soft metals such as aluminum and brass

- Removes the most stubborn dirt and decomposes fats and proteins
- Products developed for special purposes such as processing and smoking plants
- Good descaling power to remove stains, inorganic deposits and denatured proteins

- Strong alkaline detergents
- With or without chlorine
- Strong acidic foam
- Long adhesion foam
- Products specially designed for the salmon industry
- Special surfactants to solve listeria problems
- Foaming, non-foaming or foam control products

#### Disinfectants

- On open surfaces
- In boot washers
- In closed CIP systems
- Vessels / aquaculture
- Vacuum and RSW refrigeration systems
- Live and dead haul tanks

- Highly effective against all types of bacteria, fungi, viruses and parasites, especially listeria

- Recommended and used by large salmon processing facilities in Norway
- Based on peracetic acid or quaternary ammonium compounds
