

Biography Davide Malavasi

Davide Malavasi holds a degree in Chemistry and Pharmaceutical Technology (CTF) and an Executive Master in Business Administration, obtained in January 2023 with top marks from SAA School of Management, University of Turin.

Before joining Cosmo, Davide worked as a researcher at the University of Milan.

He joined Cosmo in 2003, starting his career in the analytical laboratories and later moving to the production department. Over the years, he built strong expertise as QA and QP Assistant, and in 2011 he was appointed Qualified Person (QP) and Technical Director. Since then, the facility has achieved a threefold increase in revenues.

In August 2015, Davide also assumed the role of General Manager of Cosmo S.p.A.

He has extensive experience in setting up new departments, introducing new products into the manufacturing cycle, and managing personnel. He is responsible for the release of medicinal products to the market and for the management of narcotic drugs in full compliance with legal requirements.

Currently, Davide leads the production plant, ensuring product quality, production performance, customer service levels, site renovation and modernization including safety aspects. He is also responsible for guaranteeing the regulatory compliance of the pharmaceutical facility and for managing relationships with regulatory authorities worldwide.
