

Summary of Changes

Project Overview

CPCWHS1001 – *Prepare to work safely in the construction industry* was **endorsed by State and Territory Skills Ministers in December 2021** and released on the National Training Register (NTR) in April 2022.

The revised unit supersedes and is equivalent to the previous version (CPCCWHS1001).

While most qualifications and skill sets have been updated with the current unit (CPCWHS1001), 29 qualifications, 16 skill sets, 12 accredited courses, and 6 units of competency (where CPCWHS1001 is listed as a pre-requisite unit) across the Training Package system still refer to the superseded unit (CPCCWHS1001).

The purpose of this project is to:

- communicate the pending update of CPCWHS1001 with stakeholders and other impacted JSCs, and
- update the below training products to replace the superseded unit with the updated unit.
- update other identified superseded units of competency within these qualifications to ensure qualifications remain current.

For the remaining training products that require an update, and which are not within BuildSkills Australia's (BuildSkills) remit (housed in the CUA, ICT, MSF, TLI and UEE Training Packages), BuildSkills will engage with the relevant JSCs at an early stage to ensure there is consensus on the proposed approach. Ultimately, these JSCs will need to process the change to their own Training Packages.
