

FOOT & ANKLE SPECIALTY GROUP

My staff and I are working closely with local public health departments and we are following the COVID-19 Response Team, National Institutes of Health (NIH), Centers for Disease Control and Prevention (CDC), and World Health Organization (WHO) guidelines to ensure we remain up-to-date on the COVID-19 situation, have knowledge of the most current guidelines, and are continually reviewing and refining our processes in response to changes in the situation.

**We have TELEMEDICINE appointments available. You can speak to the doctor via phone or video. Simply call the office to set up a Telemedicine consultation at:
(310) 651-2366**

We are committed to the following practices to combat the spread of Covid-19:

- We are disinfecting surfaces more frequently, asking all patients to use hand sanitizer before stepping up to the registration desk, and disinfecting exam rooms and any surfaces touched by patients.
- We are staggering patient exam times to minimize social contact in the office.
- We are leaving all doors open so there is no touching of handles.
- We are disinfecting all equipment between patients, and disinfecting the general office multiple times daily
- We are using enhanced hand-washing between each patient, and wearing a new set of gloves for each patient.

I have been proud to serve you and the community. We thank you for trusting us with your care, and we're here to support you and your family.

David J. Soomekh, DPM
