AMTHOR OFFERS A VARIETY OF TANKS TO MEET THE NEEDS OF EVERYONE IN THE PROPANE INDUSTRY

Amthor International offers four propane models to choose from, the Propane Combo, Propane Classic, Propane Clipper and Propane Bobtail. We offer a wide variety of custom materials and options so your next propane truck can be tailor made to suit your needs. All of our tanks are designed to make the driver's job safer and more efficient.

Amthor International has the largest variety of tank trucks for the propane industry. Each tank is custom built right here in America by our dedicated workers. We set the industry standard in fully customizable tanker trucks. Each of our products can be fully customized to meet all of your business' needs. We also have an array of tank options that can increase the safety and efficiency of your tank. Any combination of tank options and chassis can be made to your tanker at Amthor International.

With innovation as our foundation, Amthor International constantly strives to make cutting edge industry innovations including patents and improvements to existing products, improving employee training and education, and improving communication with customers through technology. Our extended network of dealers, distributors, and repair locations ensures quick and reliable service wherever you may be.

As a family owned and operated company, the Amthor family takes pride in each and every one of our products. That's because every tank that rolls out of our facility bears the Amthor name. Hands on owners Butch and Brian Amthor are always available throughout every step of the process to ensure your tank is built to the highest standards.

Amthor International has everything you need under one roof. Get in house financing with our sister company Horizon Capital Services. We are able to finance your unit on the spot and offer a simple, one page application with quick approvals and turnarounds. Financing is available on new and pre-owned units with low rates, terms up to 72 months, 100% financing, skip and seasonal payments, and other unusual and special situations.

At Amthor International, we are more than made in America. We are reliable solutions keeping you on the road.

WHAT MAKES AMTHOR DIFFERENT

Some of our specialized customizations include a bottle filling station that features a separate cabinet on the side of the tank to fill up smaller propane tanks, such as propane tanks for grilling, and have a scale for precise measuring. We also offer Thermaflow tank stabilization systems which allows for easier pumping.

All of our propane tanker lines can have special customizations including custom paint jobs and lettering, hose reel covers, methanol injectors, side loading and discharge, rear loading and discharge, propane changeovers or refurbishments, multi-function remote shutdown system, cabinet options, autogas fill cabinet, fully customizable lighting, rear deck customization, and much more.

With tank sizes available up to 7,000 gallons and several tank options to choose from, we can build the exact unit to suit all the needs of your business. We offer many standardized features and benefits to choose from so you get the best tank for your business.

A note from Davenport Energy, Inc. Chatham, VA

“Butch has been with me every step of the way as I’ve grown my business. Every Amthor tank I own is the highest quality tank I could buy, and it gives me peace of mind that my drivers are in the safest tank made when they are out on the road.” - Ben J. Davenport Jr., Chairman of Davenport Energy Inc.

Amthor Propane Bobtail

Our Propane Bobtail is our most popular propane tank. It features an aluminum extruded rear deck that holds all of the tanks pumping equipment such as the hose reel and meter. This specialized propane tanker is a modular system with fenders that are separate from the rear deck adding an extra layer of protection in crashes and driver safety.

- Tanks available from 800 to 7,000 US gallons
- Rear decks are available in aluminum, steel, or stainless steel. Modular rear decks are removable for easy replacement
- Aluminum formed fenders are separate from the rear deck
- Aluminum or stainless steel rear meter box is mounted on top of the rear deck to house metering equipment
- Deck mounted aluminum hose reel has a four way roller or guide arm system to make winding and unwinding the hose easy
- All LED tank lighting is housed in a waterproof, casted aluminum junction box with vapor proof wiring. Numerous additional lighting options are available
- Guardrail style rear DOT approved bumper is available in steel, stainless steel, or aluminum
- Custom paint jobs are available along with a heavy duty Corlar rock guard protection on the belly of the tank
- Multifunction remote control shut down pump system allows for safe operation of the pump system
- Fixed nozzle holder is available rear mounted or meter box mounted
- All gauges and tank fills are installed in the rear head with easy access from the rear deck
- Standard dual rear tow hooks and side suction line
- Numerous additional tank, pumping, and metering options are available
- All chassis makes and models are available

Amthor Propane Clipper

Amthor International’s Propane Clipper features a partial rear canopy on the back of the tank to protect all of the pumping equipment and valving. The rear canopy houses the hose reel that is hung invertedly and is pulled out on an angle from above versus straight out like on the Bobtail and Combo. The meter is enclosed in a framed mounted meter box under the rear canopy adding an extra layer of protection between your tank’s equipment and the harsh environmental elements.

- Tanks available from 800 to 7,000 US gallons
- All LED tank lighting is housed in a water proof, casted aluminum junction box with vapor proof wiring. Numerous additional lighting options are available
- Custom paint jobs are available along with a heavy duty Corlar rock guard protection on the belly of the tank
- Multifunction remote control shut down pump system allows for safe operation of the pump system
- Standard dual rear tow hooks and side suction line
- Rear two-door meter box mounted between chassis frame with an aluminum top and steel base
- Partial rear canopy to protect all fittings and equipment
- Inverted hose reel with dual four way roller racks.
- Side facing gauges and fills
- Aluminum formed fenders separate from the rear deck
- Guardrail style rear DOT approved bumper is available in steel, stainless steel, or aluminum
- Numerous additional tank, pumping, and metering options are available

In frame meter box that houses meter and controls

Amthor Propane Combo

Amthor International's Propane Combo tanker offers a special proprietary feature: a rear deck cover that protects equipment, keeping it out of the harsh elements and dry in rain or snow. This specially designed rear deck cover shields your equipment from the environment ensuring your tank and all its attachments will last longer. This enclosure has an uplifting rear door and a driver side and curbside access door. Having the best protection for your tank makes your driver's job safer and more efficient.

- Tanks available from 800 to 7,000 US gallons.
- Rear decks are available in aluminum, steel, or stainless steel
- Polished aluminum rear deck covering with an uplifting rear door and side access doors to protect all equipment that mounted on the deck
- Aluminum formed fenders are separate from rear deck
- Deck mounted aluminum hose reel with a four way roller or Guidearm system to make winding and unwinding the hose easy
- All LED tank lighting is housed in a water proof, casted aluminum junction box with vapor proof wiring. Numerous additional lighting options are available

Single axle Amthor propane combo delivery truck

- Guardrail style rear DOT approved bumper is available in steel, stainless steel or aluminum
- Custom paint jobs are available along with a heavy duty Corlar rock guard protection on the belly of the tank
- Multifunction remote control shut down pump system allows for safe operation of the pump system
- All gauges and tank fills are installed in the rear head with easy access from the rear deck
- Standard dual rear tow hooks and side suction line

Amthor Propane Bottle Body

Our Bottle Body trucks are used for transporting small propane tanks. The specially designed flat bed body has a crane that lifts and moves the vessels to the desired location. Each Bottle Body is designed from heavy-duty aluminum extrusions and can be customized with different length options, cabinet sizes, lift gates, and crane variations. All toolboxes are constructed with water tight aluminum extruded doors. Amthor Bottle Body units can be purchased as a complete installation on a chassis or have your next bottle body shipped directly to you as a kit.

- Complete aluminum extruded construction
- Interlocking configuration
- Various cabinet layouts and sizes
- Various load tie-down areas
- Non-skid body floor
- Lift gate and crane attachments available
- All lighting is to be LED in a water proof junction box with vapor proof wiring
- Fully installed or kit form available

Several different makes and models of cranes with various lifting capacities

Several cabinet options available

Amthor Propane Classic

Amthor Propane Classic features a full rear canopy to protect all equipment from the elements. Inverted single wrap or multi wrap hose reels are available. Meter box or platform is available for meter mounting. Many other customizable features are available. Tank can be mounted on the chassis of your choice.

- Tanks available from 800 to 7,000 WG
- Additional lighting options are available for all tanks
- All LED tank lighting is housed in a water proof, casted aluminum junction box with vapor proof wiring. Numerous additional lighting options are available
- Custom paint jobs are available along with a heavy duty Corlar rock guard protection on the belly of the tank
- Multifunction remote control shut down pump system allows for safe operation of the pump system
