## Target investment mix

| Asset                                   | Target | Actual |
|---|--------|--------|
| Cash and cash equivalents <sup>5</sup>  | 100%   | 91.56% |
| New Zealand fixed interest <sup>6</sup> |        | 8.44%  |

## Fund overview

The Kernel Cash Plus Fund is designed as a stable investment and is likely to achieve a better return than a savings account. The fund invests in New Zealand term deposits and other interest-generating assets. These kinds of investments will typically be stable in value but may have short periods of negative performance. The Cash Plus Fund aims to achieve returns comparable to the Bloomberg NZ Bond Bank Bill Index. It may be suitable for investors who want to minimise potential for investment loss but achieve a better return than a savings account.

## Distributions

The fund intends to pay quarterly distributions based on the prevailing Official Cash Rate (OCR) at the time of the distribution, paid on or near 16 January, 16 April, 16 July, and 16 October.

## Strategy

The Kernel Cash Plus Fund can be used in a variety of investment strategies:

- As a core component of a portfolio to reduce its risk and volatility
- To gain exposure to New Zealand short-term interest-bearing assets
- As an alternative to term deposits or cash management accounts

## Market overview

The events in the middle east led to much higher interest rates in NZ in March however the market has stabilised in April, beneficially giving higher yields to Fixed Income investors. If the war continues and hydrocarbon prices remain high then we are likely to face stagflation pressures - i.e. high inflation and weak growth or a recession. The RBNZ has indicated the need to act against inflation if it becomes embedded, however its not clear how hiking rates more than implied by the market will solve inflation but it would contribute to a recession. Most likely some kind of balancing act with ensue. International events remain a key risk.

## Performance

|                                     | 1 month | 3 months | 1 year | 5 years p.a. |
|-------------------------------------|---------|----------|--------|--------------|
| Performance (after fees before tax) | 0.24%   | 0.66%    | 3.50%  | N/A          |
| Benchmark <sup>7</sup>              | 0.21%   | 0.61%    | 2.95%  | 3.58%        |

## Portfolio composition

This shows the allocation of the portfolio by type of instrument:

\*Note: Deposits are net of expected settlements and include those held with banks or Inland Revenue (IRD).

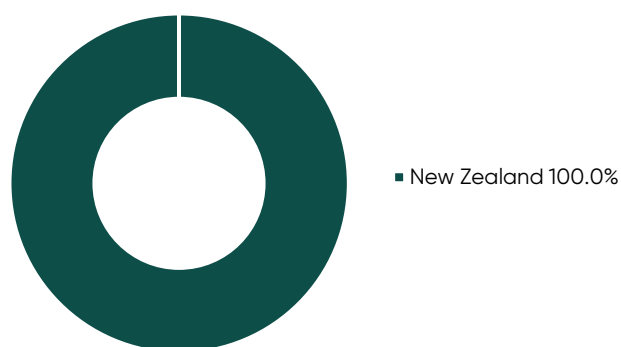

## Issuer composition

This shows the allocation of the portfolio by type of issuer:

## Where does the fund invest?

This shows the currency of the portfolio holdings:

## Credit rating

This shows the allocation of the fund by issuer credit rating (S&P or equivalent):

## Largest holdings

|                        |        |
|------------------------|--------|
| Bank of China Deposit  | 14.81% |
| Kiwibank FRN           | 9.05%  |
| Auckland Council FRN   | 4.86%  |
| Wellington Council FRN | 2.69%  |
| SBS Commercial Paper   | 2.68%  |

## About the Portfolio Manager

Matthew Winton joined Kernel in June 2022 and actively manages Kernel's fixed income funds. He has over 15 years experience as a Fixed Income specialist. Matthew started his career as a derivatives trader at Citibank Auckland and Sydney, followed by Tokyo and London. Prior to joining Kernel, he was the Head of USD derivatives and US Treasury Trading for BNP Paribas London where he successfully led a team of swaps and bond traders. Matthew's expertise and research contributes to broader investment decision making across the Kernel Funds.

## Further information

The information is not investment advice. Kernel has taken reasonable steps to ensure that the information in this document is accurate and up-to-date. Kernel does not accept any responsibility for any error or omission or for any loss resulting from the use of this information, except to the extent required by law.

1. Annualised indicative weighted average yield (net of fees, but before PIE tax) of the portfolio.
2. Duration is the weighted average time to maturity of the portfolio.
3. The offer documents are available at [www.kernelwealth.co.nz](http://www.kernelwealth.co.nz)
4. 12 month volatility is the standard deviation of daily returns, annualised by multiplying by square root of number of periods.
5. Cash equivalents includes securities with maturities less than 365 days and floating rate notes with interest rate resets at least annually.
6. New Zealand Fixed Interest is defined as NZ dollar denominated debt instruments paying a fixed interest rate and with a maturity of at least 365 days and includes hybrid securities such as preference shares and convertible bonds.
7. Calculations for benchmark returns are based off the last business day of each month rather than the last day of the month as indices are not published for non-business days. This will create an immaterial variation to relative performance as unit prices include the accrual of interest over non-business days at the end of the month.
