Average	7.93%	4.02%
Best	10.86%	15.69%

Fund overview

The Kernel Conservative Fund primarily invests in income assets with some allocation to growth assets. The fund targets a 70% fixed income and 30% equities asset allocation, investing mainly in several of the other Kernel funds. The fund is designed to fluctuate less than the Balanced Fund due to a higher allocation to income assets that are generally more stable. The fund provides broad diversification and suits lower-risk investors who seek capital preservation and income, such as retirees or short-to-medium-term investors.

Benefits

The Kernel Conservative Fund can be used in a variety of strategies:

- Portfolio core
- Low-cost global equity exposure
- Gain access to NZ and global fixed income

Performance³

	1 month	3 months	1 year	3 years p.a	5 years p.a

Further information

The information is not investment advice. Kernel has taken reasonable steps to ensure that the information in this document is accurate and up-to-date. Kernel does not accept any responsibility for any error or omission or for any loss resulting from the use of this information, except to the extent required by law.

1. The offer documents are available at www.kernelwealth.co.nz

2. 12 month volatility is the standard deviation of daily returns, annualised by multiplying by square root of number of periods.

3. Performance assumes distributions reinvested. Gross tracking difference is before fees, expenses and tax. Rounding may cause a difference of 0.01%.

4. Gross return is estimated from the 0.25% management fee.

5. Growth of a hypothetical investment in the index (no allowance for fees or taxes) and no further contributions.
