Fund overview

This fund provides exposure to blue-chip companies, being those which are large, stable and profitable. This includes household names such as Apple, Nike, Amazon, Nestle and Microsoft. With global diversification across all sectors, this fund provides reliable long-term capital growth. The global presence, combined with their large nature and competitive positioning, means these companies will be more resilient to the business cycle and domestic shocks.

Benefits

The S&P Global 100 fund can be used in a variety of investment strategies:

- Portfolio core
- A low-cost global equity exposure

Performance⁵

	1 month	3 months	1 year	3 years p.a.

Where does the fund invest?

This shows the country weight that the fund invests in:

What does the fund invest in?

This shows the GICS⁸ weighting for the fund:

Asset allocation

Asset	% of fund NAV
Cash and cash equivalents	-1.08%
Australasian equities	0.54%
International equities	100.54%

Impact⁸

Carbon Footprint:

22.25 metric tons per USD1m invested. 67% below global benchmark. Operational and first tier supply chain greenhouse gas emissions

Carbon Efficiency:

122.88 metrics tons / USD1m revenue. 24% below global benchmark. The index's absolute owned greenhouse gas emissions divided by the sum of revenues

Fossil Fuel Reserves:

566.31 metric tons per USD1m invested. 51% below global benchmark. The carbon footprint that could be generated if the proven and probable fossil fuel reserves owned by index constituents were burned per USD 1 million invested.

Eli Lilly	United States	2.46%
JPMorgan Chase	United States	2.27%
ASML	Netherlands	1.98%

The Top 10 investments make up 60.68% of the fund

Index Eligibility Criteria

Companies must have a minimum float-adjusted market capitalization of US\$ 5 billion and be considered global in nature. This means having both 30%+ of their revenues generated and 30%+ of their assets located outside of their domicile region. In addition to the above conditions, companies must have revenue from North America, Europe, and Asia/Pacific. The index must be sector balanced compared to the S&P Global 1200. Stocks with relatively larger size and higher liquidity are preferred over others. Overall the index is weighted by free float market capitalisation

1. 12 month Yield is the last 4 quarterly distributions divided by unit price 12 months ago. This is the experience an existing investor would have had.

2. Indicative Dividend is the index calculation of the underlying dividends in the last 12 months divided by the current valuation.

3. The offer documents are available at www.kernelwealth.co.nz

4. 12 month volatility is the standard deviation of daily returns, annualised by multiplying by square root of number of periods.

5. Performance assumes distributions reinvested. Gross tracking difference is before fees, expenses and tax. Rounding may cause a difference of 0.01%.

6. Growth of a hypothetical investment in the index (no allowance for fees or taxes) and no further contributions.

7. Global Industry Classification Standard (GICS)

8. Benchmark is S&P Global BMI. See explanation of Trucost methodology.
