**Actual hedging ratio:** 99.58%

## Fund overview

The Kernel US Bond Fund provides exposure to the US bond market and is hedged against currency fluctuations. The fund aims to provide a similar return as an index made up of the total U.S. investment-grade bond market including government and corporate bonds hedged into NZD.

## Strategy

The Kernel US Bond Fund can be used in a variety of investment strategies:

- As a core component of a portfolio to reduce its risk and volatility
- To gain exposure to the US fixed interest markets with the effects of the NZD currency movements reduced
- Low-cost investment grade bonds exposure

## Performance

|                                     | 1 month | 3 months | 1 year | 5 years p.a. |
|-------------------------------------|---------|----------|--------|--------------|
| Performance (after fees before tax) | 0.22%   | 0.40%    | 2.06%  | N/A          |
| Benchmark                           | 0.14%   | 0.36%    | 2.31%  | -0.67%       |
