3M Average Float Adjusted Capitalization Floor	100 million	75 million
3M Average Total Capitalization Cap	1.5 billion	2 billion

•Minimum six month Median Daily Value Traded above NZD 35,000 for new constituents and NZD 30,000 for existing constituents.

2. Indicative Dividend is the index calculation of the underlying dividends in the last 12 months divided by the current valuation.

3. The offer documents are available at www.kernelwealth.co.nz

4. 12 month volatility is the standard deviation of daily returns, annualised by multiplying by square root of number of periods.

5. Performance assumes distributions reinvested. Gross tracking difference is before fees, expenses and tax. Rounding may cause a difference of 0.01%.

6. Growth of a hypothetical investment in the index (no allowance for fees or taxes) and no further contributions.

7. Global Industry Classification Standard (GICS)
