

5. Step counter

Turn your BBC micro:bit into a step counter to help you stay active!

Improve it by adding a button to set the steps back to 0.

Find more ideas by searching for the other step counter projects on the micro:bit website: <https://microbit.org/projects/make-it-code-it/>

```
on start
  set steps to 0

on shake
  change steps by 1
  show number steps
```

The image shows two code blocks from the Scratch environment. The first block is a blue 'on start' block containing a red 'set steps to 0' block. The second block is a purple 'on shake' block containing a red 'change steps by 1' block and a blue 'show number steps' block.
