MESH MATCHER™

Every environment and roof is different. Use our online Mesh Matcher™ tool to find the right gutter mesh for you. Mesh Matcher™ asks six simple questions about your location, preferences and needs, then uses your answers to recommend the right mesh (or meshes) for you. Visit meshmatcher.com.au.

GET A QUOTE TOOL

Save time and effort and make ordering easy with the Blue Mountain Co Gutter Mesh Quote Tool. Input the steel or aluminium mesh you require, specify your colours and components and take away a one page PDF with everything you need. Visit bluemountainmesh.com.au.

COMPLIANCE

- Conforms to the Australian Standard for the Construction of buildings in bushfire prone areas (AS 3959-2009)
- Non-combustible material as per AS3959-2009 (CSIRO assessed)
- Conforms to the Building Code of Australia (BCA 2009)

GUTTER MESH

5.4mm Steel Gutter Mesh

Keeps out large leaves

Withstands hail & snow

Bushfire compliant

High strength

Keeps out pests & vermin

30 Colours

Specification Guide

PRODUCT DESCRIPTION

Blue Mountain Co 5.4mm Steel Gutter Mesh is a super-durable gutter mesh designed to prevent large leaves and debris from entering gutters and downpipes, block the entry of pests into the roof space and withstand hail and snow.

HOW IT WORKS

Blue Mountain Co Gutter Mesh is an over-the-gutter, ski-slope design which forms a physical barrier to prevent leaves and debris from entering gutters. The mesh fits from the outside edge of the gutter across the gutter section and then is attached to the roof surface. This creates a platform that suspends leaves and debris above the roof gutter, allowing the majority of material build-up to be blown away by wind action.

FEATURES AND BENEFITS

- Ideal for keeping larger leaves (e.g. palm fronds, bamboo) out of your gutters, minimising maintenance and prevent clogging and expensive flood damage
- Conforms to the Australian Standard for the Construction of buildings in bushfire prone areas (AS 3959-2009)
- Welded, overlaid, corrosion-resistant steel wires make this the strongest gutter mesh in our range
- Able to withstand hail, storms, heavy loads and other challenges such as clawing and lifting by possums and other pests
- Install with patented componentry and a choice of 30+ colours
- The gutter mesh comes in a kit complete with colour-matched trims, screws, profiles, clips or saddles to suit the required roof type

MAINTENANCE

No gutter guard system is completely maintenance free. From time to time, you will need to check your gutter guard for any debris caught on the edge of the mesh or saddles, including the valley mesh. If there is any build-up of sediment or fine debris inside the gutter, use a normal pressure hose to flush the debris through the mesh out of the gutters and down the downpipe. You should not remove the mesh whilst carrying out maintenance.

¹ Compliant for use on new homes in bushfire-prone areas with a bushfire attack level (BAL) of 12.5 or higher, as per AS3959-2009 Australian Standard: Construction of buildings in bushfire-prone areas.

COLOURS

Designed to blend with the colour scheme of your home. It is custom made and designed to match the COLORBOND® steel colour range.

Note: Zinc and Galvanised are supplied with Shale Grey™ mesh.

Printed colours are representations only and may differ from actual colours.

COMPONENTRY – IT'S ALL IN THE KIT

Kits and componentry

1. Standard gutter trim*
2. Mesh Lock Gutter Trim*
3. Corrugated profile
4. Longspan® profile
5. Bullnose profile
6. Spandek® profile
7. Decramastic profile
8. Corrugated Valley Multi-Pitch Fin
9. Metal screws
10. Trimdek® saddles
11. Safety tile clips
12. Z tile clips
13. Standard tile clips

* Optional upgrade – not included in standard kits
