BOND

Designed by
Martin Opl

Two beautifully crafted glass pendants – one convex, one concave – are fitted together with an integrated light source. Bond reflects and transmits light differently depending on the natural light that surrounds it, giving your interior a different ambience during various times of day or seasons. Expertly nanocoated and available in a range of sizes and hues, you can create the perfect formation for your space. Bond allows you to bring high-end lighting design into your home.
