Light radiates through the darkness to create space and depth. The infinite beauty and depth of the universe are reflected in the Galileo product. An expertly crafted glass orb radiates pure light and is positioned in different configurations with a flawless pendant finished in translucent argent or aurum nanocoating. This series pays homage to the sun and the moon and their symbiotic relationship of light and dark, to create a universe full of reflections and mystery.

## Colours & Shapes

\* Standard overall height of pendant (including cable) is 2500 mm / 98,43 in. The cable can be adjusted by shortening the wire.

\*\* All glass components are handmade - exact dimensions & colour can vary slightly.

Aurum 25%

Rose 25%

Argent 25%
