

i-fibre™

Save water,
chemicals
and time.

INQUIRE. INNOVATE. INSPIRE

Innovative microfibre system

Microfibre cleaning has changed the industry from the moment it was introduced. Less chemicals and water usage equals a more sustainable and healthy planet. i-team has taken this idea one step further, and created a whole series of utilities and equipment to accompany an all-in-one system simply called: i-fibre.

Wallwash

The wallwash frame bends 360°, perfect for cleaning walls and hard-to-reach places. Patented soft-edge technology makes it perfect for 4D cleaning.

Key features

Pre-treatment system

The pre-treating system is a well thought out array of tools that seamlessly work together to make cleaning tasks efficient and productive. It saves water, chemicals and most of all, time. Through the special meshed backing, time reduction is achieved to the minimum, and equally spreads the moisture.

Trio split technology

The fibre gains its huge cleaning power by a patented trio split technology. With the integrated dirt channels, it can even save the dust mopping as small particles will be captured in there. The frame is specially designed to prevent the mop from shrinking. It always aligns perfectly. Minimum guaranteed washings: 750 times.

Microfibre pads

Used for low to heavy soil levels. Features mesh backing for a quick saturation time. Designed for pre-treating in 4D cleaning systems.

Quick-release

A quick-release system in the frame of the mop for a complete touch free cleaning operation!

Bag your equipment

Proven results

Cleaning method	Traditional	4D cleaning system
Wash boards	5 minutes	3 minutes
Clean desktops	15 minutes	2 minutes
Dust mop	5 minutes	0 minutes
Wet mop	15 minutes	13 minutes

Technical specifications

	E handle 48	E handle	Plastic plate
Weight of product	0.411 kg	0.266 kg	0.281kg
Size (l x w x h)	106 x 20 x 7,5 cm	69 x 20 x 7,5 cm	41 x 50 x 10 cm
