Autumn 2024 – 2028

ABOUT THE PHD SCHOLARSHIP

Beginning in the academic year of Autumn 2024, we are offering a bespoke, fully funded Scholarship in the innovative PhD programme 'Advanced Practices' at Goldsmiths. The four-year placement is a unique academic opportunity within the field of curatorial practices and cross-cultural research, awarded to one successful candidate who identifies to any extent with Chinese and Sinophone cultures and identities, based in the regions or internationally.

Asymmetry

The Scholarship fully covers four years of the PhD programme, including tuition fees, monthly rent and living costs. The ideal candidate will be an academically determined art professional, an inventive thinker with a background in curatorial studies and/or contemporary art and relevant work experience. While we are open to all applications, we strongly welcome applicants with work experience and innovative project portfolios or academic publications.

ABOUT ASYMMETRY ART FOUNDATION

Asymmetry is a London-based independent, non-profit foundation dedicated to nurturing curatorial practice and disseminating knowledge about Chinese and Sinophone contemporary art. Asymmetry works regionally and internationally, promoting meaningful exchange between creative practitioners, institutions, and audiences to enable pioneering research, collaboration, production, and participation.

ABOUT THE DEPARTMENT OF VISUAL CULTURES, GOLDSMITHS

The Department of Visual Cultures is a small but vibrant research-active department in the School of Culture and Society at Goldsmiths, specialising in contemporary art history, theory and research architecture. The PhD programme 'Advanced

Practices' invites participants to respond to the growing importance of practice driven research within knowledge production, public exhibiting and cultural organising. Through an interrelated programme of teaching projects and collaborations, 'Advanced Practices' is geared towards advancing the grounds for different forms of practice, from artistic to infrastructural. Animated by concepts that vary from anthropology as cultural critique, curatorial knowledges to the exhibitionary matrix, amongst others, the programme encourages applicants to invent new methodologies, reframing and expanding the notions of 'practice' beyond forms of making or performing.
