

## POLYESTER (TERYLENE)

POLYESTER HAS GOOD RESISTANCE TO ULTRA-VIOLET RAYS.

Ropes exposed to a lot of sunshine are therefore often made from this fiber. Good stability and low elasticity means that Polyester is highly suitable to use in the fishing sector for instance in seine top ropes. With a specific weight of 1,38, this material is the heaviest of the fibers used in our production.

Braided leadline	Article no.	Weight/ 100 mtr	Length/bag
No. 1,0	3701003	1,2	100
No. 1,5	3701503	2,2	100
No. 2,0	3702003	3,2	100
