

Astronef

Specimen

It was in 1976, during the extremely popular movement of the "machinales computrices typefaces" inspired by science fiction and the post-second war movement of new worlds that Jean Alessandrini (typographer, designer, writer, illustrator, born in 1942 in Marseille) produced *Astronef* typeface in cut paper, this futuristic curiosity typical of the years pre-80's era. Nearly forty years later, during the making of *Revue Diorama No.2, Geometric City*, *Astronef* was digitally developed and adapted to an extended latin glyphset to cover a greater number of languages. The development was followed and validated by its author, and it is on his advice that *Astronef* is finally published today, not as a revival, but a real updated version.
