ALLOY / SmartHome

CONTACT SENSOR

Wirelesss and Reusable

With the Alloy SmartHome contact sensor you'll have peace of mind knowing your home is secure while you're away. Typically installed on doors, windows or even drawers, the contact sensor's role is to send real-time notifications when triggered by an unintentional opening. Contact sensors are wireless and easy to install, so you can place them on anything you want to keep tabs on.

- Quick & easy installation
